Step 5: obtaining sectoral licenses

Step 6: obtaining licenses to practice business

Obtaining a single approval

Prohibited economic activities according to the Regulating the Investment Environment Regulation for sectors, activities and services of activities benefiting from the Comprehensive Investment Service

## Introduction

The Investment Environment Law No. 21 of 2022 was issued in mid-November 2022 and entered into force in mid-January 2023. The Law included many improvements and advantages aimed at developing the investment environment in Jordan, improving its attractiveness and competitiveness, through granting incentives, exemptions and benefits to investors according to specific terms and requirements, as well as a number of additional incentives based on specific criteria.

The Law, in the General Investment Policies and Investor Rights Chapter, grants many advantages to investors, foremost of which are the investor's right to own an economic activity, with the exception of some sectors specified in the Regulating Investments for Non-Jordanians Regulation; to recruit non-Jordanian labor in quality administrative jobs according to specific conditions, ratios and controls; and to benefit from currency conversion in currencies convertible inside and outside the Kingdom without delay, and in accordance with the applicable international financial practices and legislation.

The Law also guarantees that Jordanian and foreign investors have equal rights, privileges and duties, and that all investors receive fair, equitable and transparent treatment, the protection of their investment and non-interference in the legally recognized activities, rights and interests of the investor or the company in which the investment was made, in addition to the digitization and automation of all procedures and services provided to them.

According to the law regulating the investment environment, the Ministry provides a Comprehensive Investment Service for licensing economic activities through an electronic platform that combines both the Ministry of Investment services and those of the entities responsible for registration and licensing.

The following figure shows the primary incentives and benefits granted to investors under the provisions of this law.

Pursuant to the issuance of the Investment Environment Law No. 21 of 2022, the Regulating the Investment Environment Regulation No. 7 of 2023 was issued, integrating 18 regulations into one, as a facilitation to investors. It outlines, among other topics, the procedures and mechanisms for submitting applications in order to benefit from the services provided through the Comprehensive Investment Service. The Regulation has defined the economic activities that benefit from the Comprehensive Investment Service as follows:

- . The industrial sector
- . Hotel and tourist facilities.
- . Amusement and recreation cities.
- . Tourist restaurants.
- . The agriculture and livestock sector.
- . Hospitals and specialized medical centers.
- . Call centers.
- . Scientific research centers and scientific laboratories.
- . Information technology services.
- . The entrepreneurship and innovation sector.
- . Conventions and exhibitions centers.
- . Artistic, media and film productions.

The Regulation also specified the services that are provided through the Comprehensive Investment Service.

The purpose of the Licensing Manual and how to use it

This Manual aims to provide detailed information to investors in Jordan regarding the provisions, procedures and requirements in line with Article No. 42 of the Investment Environment Law stating that "the Ministry shall, within three months from the date of this Law entering into force, prepare a Licensing Manual that includes the provisions, procedures, requirements and legal durations for issuing licenses in accordance with the legislation in force applied by official entities, in accordance with the Form approved by the Ministry for this purpose, to be published on the Ministry website."

This Manual was prepared in cooperation with the relevant entities as a technical document aimed at achieving stability and transparency when licensing economic activities. It was designed through adopting simplified forms, represented as comprehensive service profiles, to provide the investor with the information needed to benefit from the different Comprehensive Investment Service services, in terms of provisions, procedures, requirements and legal durations necessary to issue a license under the relevant legislation and the applicable in exchange for receiving the licensing services.

The Manual is divided into three parts:

Areas outside the development zones and free zones

Development zones

Free zones

The Manual includes a number of chapters as follows:

A summary of the licensing procedures for economic activities

The Directory of the National Classification of Economic Activities-JORSIC

A summary of the geographical scope that the Manual includes - development zones and free zones

Investments by non-Jordanians

Key terminology used in the Licensing Manual

The key steps necessary to initiate practicing any economic activity (outside the development zones and free zones)

Step 1 - registration of the legal form of the economic activity

Step 2 - post-registration services

Step 3 – Site selection and obtaining environmental approvals

Step 4 - obtaining planning regulatory approvals and building permits

Step 5 - obtaining sectoral licenses

Step 6 - obtaining vocation licenses

The key steps necessary to initiate practicing an economic activity within the development zones

Step 1 - registration of the legal form of the economic activity

Step 2- register with the Ministry of Investment as an establishment operating in the development zones

Step 3 - post-registration services

Step 4 - site selection and obtaining environmental approvals

Step 5 - obtaining planning regulatory approvals and building permits

Step 6- obtaining sectoral licenses

Step 7 - obtaining vocation licenses

The key steps necessary to initiate an economic activity within the free zones

Step 1 - registration of the legal form of the economic activity

Step 2 - post-registration services

Step 3 – site selection and obtaining environmental approvals

Step 4 - obtaining planning regulatory approvals and building permits

Step 5 - obtaining sectoral licenses

Step 6 - obtaining business licenses

Annexes

The Manual includes all the services necessary to obtain different licenses to conduct economic activities covered by the Investment Environment Law. However, some of these services are not provided through the Comprehensive Investment Service at the Ministry of Investment. References to such services are made where they are mentioned in the Manual.

## A summary of the procedures required for licensing an economic activity outside the development zones and free zones

The Manual covers the key steps necessary to initiate practicing any economic activity in Jordan, as shown in Figure 2 below.

Figure 2 - Steps for conducting economic activities in Jordan

### Step 1 – Registration of the legal form of the economic activity

This lists the steps to be followed by the investor for the purposes of establishing and registering the legal form of economic activity.

### Step 2 - post-registration services

An outline of the steps the investor needs to follow to obtain the post-registration services necessary to practice the business, that may include a license requirement for some economic activities.

### Step 3 – site selection and obtaining environmental approvals

A list of steps followed by the investor to obtain the necessary environmental approvals, permits and licenses for a number of economic activities.

### Step 4 - obtaining planning regulatory approvals and building permits

The steps the investor needs to follow to obtain the necessary permit for building and construction works of all kinds.

### Step 5 - obtaining sectoral licenses

This includes the conditions and procedures for obtaining a license to practice a specific economic activity within the different economic sectors or their branches, that are covered by the Comprehensive Investment Service services.

### Step 6 - obtaining vocation licenses

A list of the steps the investor is to follow to obtain vocation licenses from municipalities or the relevant entities throughout the kingdom.

Additional  
information

Registration for income tax: every resident, establishment or company that carries out an activity within the Kingdom, whether it is a commercial, industrial, vocational, services or artisanal activity.

Registration for sales tax: this is completed at the Income and Sales Tax Departments by all investors (persons, institutions or companies) from various economic sectors who are engaged in taxable business according to the provisions of the Sales Tax Law, whether they wish to register voluntarily or are obliged to comply subject to the Law

Registration for the Sales Tax is considered mandatory, for those whose sales, revenue from services or imports of taxable goods exceed the mandatory registration limits throughout twelve consecutive months, that are shown below:

JOD 10,000 for an industry subject to special tax

JOD 50,000 for an industry that is not subject to special tax

JOD 30,000 for the services sector

JOD 75,000 for the trade sector

There is no registration limit for importers with regard to the sales tax, therefore, every importer is obliged to register regardless of the size of his/ her imports, unless the import is exempt or is for personal use

As for income tax: Every person, institution, company or resident practicing an activity within the Kingdom, whether it is a commercial, industrial, professional, service or literal activity

It is possible to voluntarily register for the sales tax and before the mandatory registration limit is reached, in order for the taxpayer to benefit from rebates of tax on inputs (in accordance with the applicable regulations, provisions and laws) and for the purposes of tax refunds resulting from the sale of goods and services that a zero rate applies to

The authorized representative may retroactively register an investor who has failed to register as of the date on which he was required to register by law, in which case, the registration provisions contained in the General Sales Tax Law shall apply

- In the event that the investor ceases to practice the activity in whole or in part, the Comprehensive Investment Services/ Income and Sales Tax Department must be notified of this in writing within 30 days of the cessation. This condition also applies upon return to the activity

## Registration of a trade name

Registration of a trade name	
Service name / purpose	Registration of a trade name
The relevant entity	Ministry of Industry, Trade and Supply/ Directorate of Trade Registration by applying through the authorized representative at the Comprehensive Investment Service
The beneficiary	Investor/ natural or juridical person/ established entity
Registration conditions	<p>The original trade name must be registered in Arabic An exception may be made by a decision of the Registrar of trade names to register trade names in a foreign language if they are owned by persons or foreign companies or companies with mixed capital registered and used outside the Kingdom Registration of a trade name may require a study in order to verify the applicability of the legal requirements (the Registrar issues his/ her decision to accept or reject the registration within 10 days from the date of submission of the application) If the registration of a trade name is for a sole proprietorship, the investor must be present in person (individual trader) or his/ her authorized representative who has a power of attorney (general or special) In cases of registering a trade name for a company, association or a body, the authorized signatory must be present to sign in person and check the registration procedure with the authorized representative at the Ministry of Industry, Trade and Supply at the Comprehensive Investment Service and to register with the electronic services and obtain a login name and password A first-time registration of a trade name of a company may be completed through an attorney/solicitor with a power of attorney The investor may submit an application for registration of a trade name electronically</p>
Pre-approvals and pre-requisites (if any)	<p>In the event of registering a trade name for a civil company, association or entity, this requires obtaining the approval of the Minister of Industry, Commerce and Supply to register the trade name (whereby the manager will forward an opinion to the Minister on the registration of the trade name accompanied by the application and documents) The approval of the relevant entity (to which the association or body belongs) to exercise an economic activity must be obtained, alternatively, the economic activity is allowable under a legal provision</p>
Required documents	<p>The valid Civil Status ID card of the Jordanian investor (individual trader) A legal power of attorney (general or special) in cases where the applicant does not attend the registration A travel document/ passport, valid for at least six months, for a non-Jordanian investor A solicitor power of attorney in the event that the application is submitted by an attorney to register a trade name for a company for the first time To register a trade name for a company, a copy of the company registration certificate (trade register) or a "To Whom it May Concern" letter must be submitted, indicating the company purposes and the authorized signatory on its behalf To register a trade name for an association or body, an authenticated copy of the registration certificate (trade register) of the association or body must be submitted in addition to its articles of association</p>
The forms used	<p>Apply for electronic services at the Ministry of Industry, Commerce and Supply if the applicant is a company, association or body. Application for registration of a trade name submitted electronically through the website of the Ministry of Industry, Trade and Supply/ electronic services-sole proprietorships and trade names (registration of trade names)</p>

Procedures/ action steps	<p>The investor (individual trader) or authorized representative with a legal power of attorney (general or special) or the authorized signatory (company, association or body) visits the authorized representative of the Ministry of Industry, Commerce and Supply/ Directorate of Trade registration at the Comprehensive Investment Service</p> <p>The investor (company/ association/ body) is added and their data is entered into the system enrolling them in the electronic services and providing them with the login name and password</p> <p>The investor submits an application for electronically registering a trade name and enters all the required data</p> <p>The application is checked, reviewed and approved if there is no need for any amendment to the application and a message is sent to the investor's phone number containing the electronic payment number. If there is a need for an amendment, a message is sent to the investor stating that the application needs to be amended</p> <p>Registration fees are paid electronically and the receipt is then handed to the employee of the Trade Registration Department</p> <p>The application is extracted and signed by the investor or the authorized representative</p> <p>A trade name registration certificate is issued and is handed to the investor</p>
Fees	<p>JOD 20 Trade name registration fees</p> <p>JOD 5 Fees for using a general power of attorney (in cases where a power of attorney is used)</p> <p>JOD 2 fees for using a special power of attorney (in cases where a power of attorney is used)</p> <p>JOD 40 fees for presenting a solicitor power of attorney when a power of attorney is submitted by an attorney, and these are payable to the Jordanian Bar Association as well as the power of attorney fee according to its type (general or special).</p>
Required duration	<p>20-40 minutes if the documents and application are complete</p> <p>A maximum of 10 working days in rare cases (if the transaction requires studying the name to be registered to verify that the legal requirements apply)</p>
The final output	Trade name registration certificate
Relevant legislation	<p>Trade Names Law No. 9 of 2006</p> <p>Trade Names Law No. 116 of 2004 and its amendments</p> <p>Instructions No. 32 of 2016 for the transfer of ownership procedures of the trade name, its holding, seizure and other legal actions related to it, including the license to use it</p>
Additional information	<p>If the requested trade name needs to be studied for any reason, the request for the expression of an opinion is postponed for reasons of fairness and objectivity, provided that the response period does not exceed the legal period specified for registering the trade name, which is ten days.</p>

### Step 3: site selection and obtaining environmental approvals

#### Selection of development sites

Annex 1 sets out a list of requirements stipulated for the site selection for a number of economic activities representing the requirements for obtaining environmental approvals at a later stage. The profiles for sectoral licenses in Step 5 of the Manual show the documents, conditions and procedures for obtaining site approvals for the different types of economic activity covered by the services of the Comprehensive Investment Service.

Some activities need to obtain prior approval from the Ministry of Environment according to a hazard classification shown in the following table:

Level of severity	Required approval	Requirements
Low-risk - see Annex 2	None	Compliance with environmental requirements
Limited risk-see Annex 3	Environmental site approval	Compliance with environmental requirements
Medium risk-see Annex 4	Environmental permit	Conducting an initial environmental impact assessment study
High risk-see Annex 5	Environmental permit	Conducting a comprehensive environmental impact assessment study

#### Issuing a site environmental approval

An approval is obtained from the Ministry of Environment for activities classified as "low risk" as shown in Annex 2 of this Manual, and obtaining a site approval for these activities does not require an environmental impact assessment.

Issuing a site environmental approval	
Service name/ purpose	To obtain an environmental approval for development and infrastructure projects for low-risk projects (an environmental impact assessment study is not required)
The relevant entity	Ministry of Environment
Beneficiary	Investor/ natural or juridical person
Special conditions	
Pre-approvals and prerequisites (if any)	None
Required documents	Trade register Land parcel plan A croquis plan from a licensed engineering office is required only for lands with an area greater than 10 Dunums (10,000m <sup>2</sup> ) Land title register Land parcel regulatory site plan Land parcel cadastral coordinates
The forms used	A request letter submitted by the owner or their representative A technical form for industrial projects

Procedures / action steps	<p>The application is submitted with all the required documents and project details attached</p> <p>Payment of fees</p> <p>A phone call to schedule a sit visit is received</p> <p>The site visit is conducted by the Directorate of Licenses and Pollution Reduction from the Ministry of Environment with the investor or the representative present</p> <p>Presentation of the application, accompanied by the site visit report, to the Environmental Approvals Committee</p> <p>Receive notification of the Committee decision</p> <p>If the Committee approves, a text message is received informing the investor that the letter is ready</p>
Fees	JOD 25
Required duration	10 working days if there is no need to conduct an environmental impact assessment study
The final output	Official environmental approval letter
Relevant legislation	<p>Environmental Protection Law No. 6 of 2017</p> <p>Environmental Impact Assessment System No. 37 of 2005</p> <p>Instructions for the Site Selection for Development Activities of 2018</p> <p>Environmental Classification and Licensing Regulation No. 69 of 2020</p>
Additional information	

Issuing environmental licenses (an initial or comprehensive environmental impact assessment study) for medium-risk activities

These services are provided outside the scope of the Comprehensive Investment Service and must be provided directly through the relevant entities – whether electronically or in person.

Economic activities classified as "medium risk " are required to provide an initial environmental impact assessment of the project by one of the consultancy bodies classified by the Ministry of Environment. Annex 4 of the Manual shows a list of such activities

Issuing environmental licenses for medium-risk activities	
Purpose	To obtain an environmental approval and grant licenses for development projects and infrastructure projects classed as medium-risk projects (these also need to conduct an initial environmental impact assessment study)
The relevant entity	Ministry of Environment
Beneficiary	The investor through the consultancy body
Special conditions	<p>The development activity must be a distance from the nearest dwelling in a population center or within the boundaries of the planned zoned regulated areas, equal to the distance stated in the special conditions for each of the activities located outside the planned zoned regulated areas</p> <p>The distances specified in the requirements are measured as air distances from the boundaries of the activity in question to the boundaries of another activity in terms of distances between factories; and from the activity boundaries to the nearest dwelling in terms of distances between the activity in question and population centers</p> <p>The prevailing wind direction must be considered when conducting these activities</p> <p>The planned regulated land use regulation must be complied with Requirements contained in any other applicable legislation to approve the site for development activities must be taken into account, including the requirements of the Ministry of Water and Irrigation to protect water sources intended for drinking purposes</p>
Pre-approvals and prerequisites (if any)	None
Required documents	<p>Trade register</p> <p>Land parcel plan</p> <p>A croquis drawing from a licensed engineering office is required only for lands of an area greater than 10 Dunums (10,000 m2)</p> <p>Land title registration</p> <p>Land parcel regulatory site plan</p>
The forms used	<p>A request letter submitted by the person concerned or his/ her representative</p> <p>A technical form for industrial projects</p>

Procedures / action steps	<p>The application is submitted with all the required documents and project details attached</p> <p>Fees are paid</p> <p>A phone call to schedule a site visit is received</p> <p>The investor is present for the site visit carried out by the Directorate of Licenses and Pollution Reduction from the Ministry of Environment</p> <p>The application is presented, accompanied by site visit report, to the Environmental Approvals Committee</p> <p>Notification of the committee decision is received</p> <p>If the Committee approves, a text message is received informing the investor that the letter is ready</p> <p>A consulting firm classified by Ministry of Environment is asked to conduct an initial environmental impact assessment study</p> <p>The fees required for the initial environmental impact assessment study are paid</p> <p>The consultancy body should provide the Directorate with an initial draft of the benchmark/ reference principals for the initial environmental impact assessment study it intends to carry out</p> <p>The consultancy body is notified with the Committee decision</p> <p>After the approval of the benchmark/reference principals for the initial environmental impact assessment study of the project, the consulting entity begins to conduct the initial environmental impact study</p> <p>The study is presented to the Environmental Impact Assessment Committee for review and analysis and to ensure that it complies with the reference principals</p> <p>The Environmental Impact Assessment Committee issues its decision on the study</p> <p>Notification of the Committee decision is received</p>
Fees	JOD 50
Required duration	<p>15 working days</p> <p>45 days from the date of receipt of the environmental impact assessment study report (if an environmental impact assessment study is required)</p>
The final output	An official letter approving the initial study
Relevant legislation	<p>Environmental Protection Law No. 6 of 2017</p> <p>Environmental Impact Assessment Regulation No. 37 of 2005</p> <p>Instructions for the Site Selection for Development Activities of 2018</p> <p>Environmental Classification and Licensing Regulation No. 69 of 2020</p>
Additional information	

Issuing environmental licenses (an initial or comprehensive environmental impact assessment study) for high-risk activities

These services are provided outside the scope of the Comprehensive Investment Service and must be provided directly through the relevant entities – electronically or in person.

Economic activities that are classified as high-risk need a comprehensive environmental impact assessment study of the project by one of the consultancy bodies classified by the Ministry of Environment. Annex 5 of the Manual shows a list of such activities

<b>Issuing environmental licenses for high-risk activities</b>	
Service name/ purpose	To grant an environmental approval and licenses for development projects and infrastructure projects classed as high-risk (a comprehensive environmental impact assessment study is needed)
The relevant entity	Ministry of Environment
Special conditions	<p>The development activity must be a distance from the nearest dwelling in a population center or within the boundaries of the planned zoned regulated areas and, equal to the distance stated in the special conditions for each of the activities located outside the planned zoned regulated areas</p> <p>The distances specified in the requirements are measured as air distances from the boundaries of the activity in question to the boundaries of another activity, regarding distances between factories; from the activity boundaries to the nearest dwelling, regarding distances between the activity in question and population centers</p> <p>The prevailing wind direction should be considered when conducting these activities</p> <p>The planned regulated land use regulation must be complied with</p> <p>The provisions of other applicable legislation relevant to site approval for of development activities should be taken into account, including the applicable requirements of the Ministry of Water and Irrigation to protect water sources intended for drinking purposes</p>
Pre-approvals and prerequisites (if any)	None
Required documents	<p>Trade registration certificate</p> <p>Land parcel plan</p> <p>A croquis drawing from a licensed engineering office is required only for lands with an area greater than 10 Dunums (10,000m<sup>2</sup>)</p> <p>Land title register</p> <p>Land parcel site regulatory plan</p> <p>Land parcel cadastral coordinates</p>
The forms used	<p>A request letter from the person concerned or his/ her representative</p> <p>A technical form is filled out of industrial projects</p>

Procedures/ action steps	<p>The application is submitted with all the required documents and project details attached</p> <p>Fees are paid</p> <p>A phone call to schedule a site visit is received</p> <p>The investor is present for the site visit carried out by the Directorate of Licenses and Pollution Reduction from the Ministry of Environment</p> <p>The application is presented, accompanied by site visit report, to the Environmental Approvals Committee</p> <p>Notification of the committee decision is received</p> <p>If the Committee approves, a text message is received informing the investor that the letter is ready</p> <p>A consulting firm classified by Ministry of Environment is asked to conduct a comprehensive environmental impact assessment study</p> <p>The fees required for a comprehensive environmental impact assessment study are paid</p> <p>The consultant should provide the Directorate with an initial draft on the benchmark/reference principles for the comprehensive environmental impact assessment study that it intends to carry out</p> <p>The consultant, in coordination with the Ministry and the entities designated by it, shall hold a consultative workshop over one or more meetings to discuss the expected effects that may result from the project</p> <p>A report on the consultation workshop is prepared</p> <p>The consultant is notified of the Committee decision regarding the outputs of the consultation workshop and the benchmark/ reference principles</p> <p>Upon the approval of the benchmark/reference principles for the project comprehensive environmental impact assessment study, the consultant begins conducting a comprehensive environmental impact study</p> <p>The study is presented to the Environmental Impact Assessment Committee for review and analysis and to ensure that it complies with the provisions of the law and the benchmark/ reference principles</p> <p>The Environmental Impact Assessment Committee issues its decision on the study</p> <p>The applicant receives notification of the Committee decision</p> <p>If the Committee approves, the applicant receives a text message that the letter regarding the Committee approval of the study is ready</p>
Fees	JOD 750
Required duration	45 days from the date of receipt of the comprehensive environmental impact assessment study report
The final output	An official letter approving the comprehensive environmental assessment study
Relevant legislation	<p>Environmental Protection Law No. 6 of 2017</p> <p>Environmental Impact Assessment Regulation No. 37 of 2005</p> <p>Instructions for the Site Selection for Development Activities of 2018</p> <p>Environmental Classification and Licensing Regulation No. 69 of 2020</p>
Additional information	

## Issuing an environmental permit

After the initial or comprehensive environmental impact assessment study is completed, the Environmental Approvals Committee issues an environmental permit allowing for work on the project activities to begin

Environmental permit	
Service name/ purpose	Obtaining an environmental "permit" license for development projects and infrastructure projects for medium or high-risk projects (that have already completed an initial or comprehensive environmental impact assessment study)
The relevant entity	Ministry of Environment
Special conditions	An initial or comprehensive environmental impact assessment study has been completed according to the risk level category requirements, and approved by the Environmental Impact Assessment Committee
Pre-approvals and prerequisites (if any)	An environmental impact assessment study (initial or comprehensive) or an environmental audit study
Required documents	
The forms used	A request letter from the owner or his/ her representative
Procedures/ steps	The application is submitted accompanied by all the required documents and project details Payment of fees A phone call is received to schedule a site visit The site visit is attended The application is presented, accompanied by the field visit report, to the Environmental Approvals Committee A notification is received of the Committee decision and a text message is later received that the approval letter is ready
Fees	JOD 500
Required duration	14 working days
The final output	Official letter approving of the environmental license "permit"
Relevant legislation	Environmental Protection Law No. 6 of 2017 Environmental Impact Assessment Regulation No. 37 of 2005 Instructions for the Site Selection for Development Activities of 2018 Environmental Classification and Licensing Regulation No. 69 of 2020
Additional information	

#### Step 4: site selection and obtaining regulatory approvals and construction

These services are provided outside the scope of the Comprehensive Investment Service and must be provided directly through the relevant entities – electronically or in person.

Building permits and occupancy permit issuance - Within the boundaries of Greater Amman Municipality Initial approval

<b>Request a consultation concerning buildings (initial approval)</b>	
Purpose	Request a buildings consultation (initial approval) before beginning design and construction
The relevant entity	Greater Amman Municipality
Beneficiary	All categories of service recipients
Required documents	Statement of change for the land parcel The agreement with engineering office to produce engineering drawings/ blueprints
The forms used	Greater Amman Municipality website <a href="http://www.amman.jo">www.amman.jo</a>
Procedures/ action steps	Access the Greater Amman Municipality website <a href="http://www.amman.jo">www.amman.jo</a> . Select electronic services from the main screen on the website Select the licensing services/ Building Licenses Department Select the service requesting a buildings consultation(initial approval) Fill in the required data on the application submission screen and attach the necessary documents A message is received with the application number and the electronic payment number to pay the registration fee After checking the application and if the attached documents are incomplete/ with error, a message is received indicating the incorrect/ missing attachments If the application is approved, a text message is received informing the applicant that the provisional approval has been granted If the application is not approved, a text message is received stating that the application was not approved
Fees	JOD 25
Required duration	8 – 10 days
The final output	Initial approval of the submitted engineering designs
Relevant legislation	
Additional information	

A building permit for a proposed building on a vacant land parcel

<b>A building permit for a proposed building on a vacant land parcel</b>	
Purpose	Issue a building permit for the construction of a new building (proposed) on a vacant land parcel
The relevant entity	Greater Amman Municipality
Beneficiary	The investor through the engineering office
Required documents	The engineering drawings/ blueprints approved by the Jordan Engineers Association prior to electronically submitting the application Land parcel statement of change or a cadastral report A commitment to the Directorate of Antiquities of the Capital/ Amman Governorate in order to request a building permit using the form on the application screen The engineering office statement that the information on the topographic map is correct
The forms used	Greater Amman Municipality website <a href="http://www.amman.jo">www.amman.jo</a>

Procedures/ action steps	<p>Access the Greater Amman Municipality website <a href="http://www.amman.jo">www.amman.jo</a>. Select electronic services from the main screen on the website. Select the Building Department licensing services and select the type of service required as "request to issue a proposed building permit on a vacant land parcel" and fill in the required data on the application submission screen</p> <p>After checking the application and if the attached documents are incomplete/ with error, a message is received indicating the incorrect/ missing attachments</p> <p>Upon submitting the engineering blueprints/ drawings already approved by the Jordan Engineers Association to the Civil Defense Directorate and in the event of an amendment required by the service applicant, a text message is received with the request to amend the blueprints/ drawings and to re-authenticate them from the Jordan Engineers Association</p> <p>If the Civil Defense Directorate does not grant an approval, a text message is received stating the reasons for the non-approval of the application. If the application is approved by the Civil Defense Directorate, a text message is received stating the amount of the application registration fee incurred by the applicant</p> <p>The application is checked for any financial payments due in the form of fees or claims (Buildings and Lands Tax (Musaqafat), amounts payable to the municipality) and if some claims or pending fees exist, a text message is received with the amounts payable and the need to pay them electronically</p> <p>If an amendment is required by the recipient of the service, a text message with the required modification is received</p> <p>Upon presentation to the relevant committee, a text message is received by the applicant informing him/ her of the committee decision (approval/ conditional approval/ rejection) whereby the opportunity to object is available through the application query screen</p> <p>If an objection to the committee decision is submitted, a text message is received with the new committee decision</p> <p>After the approval of the application by the committees, a text message with the required external approvals is received depending on the type of application (where applicable)</p> <p>After checking the required external approvals and obtaining external approvals/ or in cases where no external approvals are needed, a text message is received with the fees incurred based on the application whereby any objection to the fee amount can be submitted by accessing the application query screen</p> <p>If an objection to the fee amount is submitted and the objection is rejected, a text message is received declining an amendment to the fee and the reasons for this</p> <p>If the objection is accepted and the fees are amended, a message with the amendment of the fees and the new electronic payment number is received</p> <p>In cases where the applicant does not wish to object/ after amending the fees, payment is made electronically, after which a text message is received that an earth works (excavation) permit must be issued to obtain the license</p> <p>After obtaining the earth works (excavation) permit, the application query screen is accessed and the reference number of the issued earth works (excavation) permit is entered, and a text message is received with the issuance of the license and the possibility of downloading it through the application tracker screen on the website</p>
Fees	<p>Greater Amman Municipality fees: The fees are determined according to the land parcel planning/regulatory category and the construction area in accordance with Articles 48 to 52 of the Building and Planning Regulation in the City of Amman No. 67 of 1979.</p> <p>Fees incurred by the Civil Defense Directorate: The fees are determined in accordance with the Collection of Fees for the Services of the of Civil Defense Directorate Regulation No. 128 of 2015 and its amendments</p>
Required duration	10-21 days
The final output	Issuing the building permit electronically

<p>Relevant legislation</p>	<p>Procurement Law No. 12 of 1987          Jordanian National Building Law No. 7 of 1993 and its amendments          Cities, Villages and Buildings Regulation Law No. 79 of 1966 and its amendments          Amended Building and Regulating of Cities and Villages Regulation No. 3 of 2017          Buildings and Planning Regulation in the city of Amman No. 28 of 2018 and its amendments          The Building and Regulating of Cities and Villages Regulation No. 136 of 2016 and its amendments          Jordan Engineers Association Law No. 15 of 1972          Practice of the Engineering Profession Regulation No. 22 of 1999          Engineering Offices and Companies Regulation No. 28 of 2016          Environmental Protection Law No. 6 of 2017          Environmental Impact Assessment Regulation No. 37 of 2005          Instructions for the Site Selection for Development Activities of 2018          Environmental Classification and Licensing Regulation No. 69 of 2020          Instructions for the application of codes in all phases of design, implementation, supervision, maintenance, operation, public safety works and all related engineering works of the year 2004          Instructions for the application of engineering codes at all stages of engineering works related to the technical requirements of public safety conditions to be provided for construction excavation/ earthworks for construction projects in the Kingdom for the year 2018          Antiquities Law No. 21 of 1988          Public Security Law No. 38 of 1965 (as amended in 2020)          Civil Defense Law No. 18 of 1999 and its amendments          Fee Collection for the Services of the Civil Defense Directorate Regulation No. 128 of 2015 and its amendments</p>
<p>Additional information</p>	<p>In the event that the local committee does not implement the requested amendment within ten days, a text message is received notifying that the period necessary for the implementation of the amendment has lapsed and a decision is made by the Committee to approve or reject the request          If the requested amendment is not implemented by the relevant parties after submitting the request to object to the fees within ten days, a text message is received that the period necessary to implement the amendment has expired and that his/ her request of objecting to the fees has been canceled and that he/ she must pay the fees as they were originally stated          If an objection to the fees is not submitted within 30 days, it follows that the fees will be paid as they were originally stated, with no opportunity to object because the period for this has lapsed</p>

A building permit for a proposed building above an existing building

Proposed above an existing building	
Purpose	Issuing a building permit for the construction of a new building (proposed) above an existing building
The relevant entity	Greater Amman Municipality
Beneficiary	The investor through the engineering office or company
Required documents	Engineering blueprints/ drawings approved by the Jordan Engineers Association prior to submitting the application electronically An authenticated technical report from the Jordan Engineers Association that the building is safe or a technical inspection report in compliance with to the National Building Law (after approval from the committees)
The forms used	Greater Amman Municipality <a href="http://www.amman.jo">www.amman.jo</a>
Procedures/ action steps	<p>Access Greater Amman Municipality website <a href="http://www.amman.jo">www.amman.jo</a>. Select electronic services from the main screen on the website. Select the Building Department licensing services and select the type of service required as "license a proposed building above an existing building" and fill in the required data</p> <p>After checking the application and if the attached documents are incomplete/ with error, a message is received indicating the incorrect/ missing attachments After sending the engineering blueprints/ drawings approved by the Jordan Engineers Association to the external partners (Civil Defense) and in the event of a required modification by the applicant, a text message with the required modification is received requesting that the blueprints/ drawings are modified and re-authenticated from the Jordan Engineers Association</p> <p>In cases where the Civil Defense Directorate does not grant an approval, a text message is received stating the reasons for the rejection of the application. If the application is approved by the Civil Defense Directorate, a text message is received stating the application registration fee amount to be paid by the recipient of the service</p> <p>The application is checked for any payments due in terms of the existence of some fees or claims (Buildings and Lands Tax (Musaqafat), amounts payable to the municipality) and if some claims or pending fees exist, a text message is received with the amounts payable and the need to pay them electronically</p> <p>Upon presentation to the relevant committee, a text message is received by the applicant informing him/ her of the committee decision (approval/ conditional approval/ rejection) whereby the opportunity to object is available through the application query screen</p> <p>If an objection to the committee decision is submitted, a text message is received with the new committee decision</p> <p>Upon the approval of the application by the committees, a text message is received with external approvals/ additional documents required according to the type of application (where applicable)</p> <p>Upon checking the attached documents and after obtaining the required external approvals/ additional documents, a text message is received with the fees incurred on the application with the opportunity to object to the fee amount by accessing the application query screen</p> <p>If an objection to the value of the fee is submitted and an amendment to the fees request is declined, a text message is received informing the applicant that the request was declined and the reasons are stated</p> <p>If the objection is accepted and the fees are amended, a message with the amendment of the fees and the new electronic payment number is received</p> <p>If the applicant does not wish to object/ the fees are amended, payment is made electronically, after which a text message is received with the issuance of the license and the option to download it through the application tracker screen on the website</p>

Fees	<p>Greater Amman Municipality Fees: The fees are determined according to the land parcel planning/regulatory category and the construction area in accordance with Articles 48 to 52 of the Building and Planning Regulation in the City of Amman No. 67 of 1979</p> <p>Fees incurred by the Civil Defense Directorate: The fees are determined in accordance with the Collection of Fees for the Services of the of Civil Defense Directorate Regulation No. 128 of 2015</p>
Required duration	10-21 days
The final output	Issuance of a building permit electronically
Relevant legislation	<p>Procurement Law No. 12 of 1987 Jordanian National Building Law No. 7 of 1993 and its amendments Cities, Villages and Buildings Regulation Law No. 79 of 1966 and its amendments Amended Building and Regulating of Cities and Villages Regulation No. 3 of 2017 Building and Planning Regulation in the City of Amman No. 28 of 2018 and its amendments The Building and Regulating of Cities and Villages Regulation No. 136 of 2016 and its amendments Jordan Engineers Association Law No. 15 of 1972 Practice of the Engineering Profession Regulation No. 22 of 1999 Engineering Offices and Companies Regulation No. 28 of 2016 Environmental Protection Law No. 6 of 2017 Environmental Impact Assessment Regulation No. 37 of 2005 Instructions for Site Selection for Development Activities of 2018 Environmental Classification and Licensing Regulation No. 69 of 2020 Instructions for the application of codes in all phases of design, implementation, supervision, maintenance, operation, public safety works and all related engineering works for the year 2004 Instructions for the application of engineering codes at all stages of engineering works related to the technical requirements of public safety conditions to be provided for construction excavation/ earthworks for construction projects in the Kingdom for the year 2018 Antiquities Law No. 21 of 1988 Public Security Law No. 38 of 1965 (as amended in 2020) Civil Defense Law No. 18 of 1999 and its amendments Fee Collection for the Services of the Civil Defense Directorate Regulation No. 128 of 2015 and its amendments</p>

Building permits and occupancy permits - outside the boundaries of Greater Amman Municipality (from other municipalities)

These services are provided outside the scope of the Comprehensive Investment Service and must be provided directly through the relevant entities personally.

Building permit (construction license)

<b>Obtaining a building permit within municipal borders</b>	
Purpose	Issuing a building permit for the construction of a new building (proposed)/ restoration of an existing building
The relevant entity	Ministry of Local Administration-the relevant municipality
Beneficiary	The investor through the engineering office
Required documents	<p>Five copies of the engineering drawings/ blueprints approved by the Jordan Engineers Association (3 authenticated copies + two copies stamped as copies of originals)</p> <p>Original and valid land title register</p> <p>Original and valid site regulatory plan</p> <p>Original and valid land parcel plan</p> <p>Topographic map of the site</p> <p>Land parcel cadastral coordinates</p> <p>Geological study (soil analysis in cases of proposed construction)</p> <p>Environmental impact assessment study</p> <p>Traffic impact study (if necessary)</p> <p>Approval of the Department of Antiquities (if there is construction proposed)</p> <p>Clearance certificate from the municipality (Buildings and Lands Tax (Musaqafat))</p> <p>Checking the license application that it is stamped by multiple official bodies (Water Authority, Jordan Telecommunications Company, Department of Antiquities, Directorate of Civil Defense, Directorate of Public Security/ Command and Control Department)</p> <p>A letter from the Jordan Engineers Association regarding sales tax (sales tax receipt)</p> <p>Contracting agreement</p> <p>Engineering supervision contract (for the proposed construction of an area exceeding 250 m<sup>2</sup>)</p> <p>Vocation license for the engineering office</p>
The forms used	The application requesting the issue of a building permit

Procedures/ action steps	<p>Within the boundaries of planned zoned regulated municipal areas:  Submit the application for the building permit accompanied by all the required documents to the relevant municipality  The municipality conducts a technical review and a site visit, and the application is presented to the local committee to study and make a final decision concerning it  The decision is recorded and the investor is informed of the decision. If the application is rejected, the investor has the right to object to the local committee decision (and in this case, the application is submitted to the district committee)  The application is considered by the Higher Regulatory Council and if the application is approved, the investor will pay the due fees and receive a payment order  The building permit is issued and handed to the investor</p> <p>Outside the boundaries of municipal planned zoned regulated areas:  An application for the building permit accompanied by all the required documents is submitted to the relevant directorate of municipal affairs in the district/ governorate.  The technical staff working at the Directorate of Municipal Affairs conduct a technical review and site visit, and the application is presented to the district committee to study and take the final decision  The application is considered by the Higher Regulatory Council and if the approval decision is issued, the investor pays the fees to the relevant municipality when the project is located within its administrative boundaries, whereas, the fees are paid to the relevant directorate of municipal affairs if the project is located outside the administrative boundaries of the neighboring municipality. A payment order and receipts are received in both cases  The building permit is issued and handed to the investor</p>
Fees	<p>Greater Amman Municipality fees:  The fees are determined according to Articles 19-22 of the Building and Regulating of Cities and Villages Regulation No. 136 of 2016 and its amendments  Fees incurred by the Civil Defense Directorate:  The fees are determined in accordance with the Collection of Fees for the Services of the of Civil Defense Directorate Regulation No. 128 of 2015 and its amendments</p>
Required duration	15 working days if the prepared drawings comply with the regulatory requirements
The final output	Issuance of a building permit

<p>Relevant legislation</p>	<p>Procurement Law No. 12 of 1987          Jordanian National Building Law No. 7 of 1993 and its amendments          Cities, Villages and Buildings Regulation Law No. 79 of 1966 and its amendments          Amended Building and Regulating of Cities and Villages Regulation No. 3 of 2017          Building and Planning Regulation in the City of Amman No. 28 of 2018 and its amendments          The Building and Regulating of Cities and Villages Regulation No. 136 of 2016 and its amendments          Jordan Engineers Association Law No. 15 of 1972          Practice of the Engineering Profession Regulation No. 22 of 1999          Engineering Offices and Companies Regulation No. 28 of 2016          Environmental Protection Law No. 6 of 2017          Environmental Impact Assessment Regulation No. 37 of 2005          Instructions for Site Selection for of Development Activities of 2018          Environmental Classification and Licensing Regulation No. 69 of 2020          Instructions for the application of codes in all phases of design, implementation, supervision, maintenance, operation, public safety works and all related engineering works for the year 2004          Instructions for the application of engineering codes at all stages of engineering works related to the technical requirements of public safety conditions to be provided for construction excavation/ earthworks for construction projects in the Kingdom for the year 2018          Antiquities Law No. 21 of 1988          Public Security Law No. 38 of 1965 (as amended in 2020)          Civil Defense Law No. 18 of 1999 and its amendments          The fees are determined in accordance with the Collection of Fees for the Services of the of Civil Defense Directorate Regulation No. 128 of 2015 and its amendments</p>
<p>Additional information</p>	<p>The relevant committee grants environmentally friendly green buildings that are characterized by their ability to conserve energy, utilize renewable energy, conserve water usage, rely on natural lighting and ventilation to reduce energy consumption and reduce the environmental pollution resulting from them, and are established in accordance with the Green Building Guide issued by the National Building Council, all or some of the incentives and facilities mentioned in Article 23 of the Building and Regulating of Cities and Villages Regulation No. 136 of 2016.</p>

<b>Obtaining an occupancy permit for a site within municipal boundaries</b>	
Purpose	Issuing an occupancy permit to allow the use of the building after the completion of its construction
The relevant entity	Ministry of Local Administration- the relevant municipality
Beneficiary	The investor
Required documents	Original and valid land title register Original and valid site regulatory plan Original and valid land parcel plan Clearance certificate from the Municipality (Buildings and Lands Tax (Musaqafat)) A copy of the most recent building permit
The forms used	Application for an occupancy permit service
Procedures/ action steps	<p>Within the boundaries of planned zoned regulated areas: Submit an application requesting an occupancy permit, accompanied by all the required documents at the relevant municipality The municipality, in addition to the Civil Defense, conducts an engineering/ technical review and site visit, and the application is presented to the local committee for study and a final decision The decision is recorded and the investor is informed of the decision The investor pays the due fees and receives a payment receipt The occupancy permit is issued and handed to the investor</p> <p>Outside the boundaries of planned zoned regulated areas: Submit an application for the occupancy permit service, accompanied by all the required documents to the relevant directorate of municipal affairs in the district/ governorate the project is located in The technical staff from the Directorate of Municipal Affairs and the Civil Defense Directorate representatives conduct a technical review and site visit, and the application is presented to the district committee to study and make a final decision The decision is recorded and the investor is informed of the decision. The investor pays the due fees and receives a payment receipt The occupancy permit is issued and handed to the investor</p>
Fees	<p>Fees payable to municipalities:</p> <p>No fees are incurred if the building construction complies with the building permit If the building does not comply with the building permit, the fees for the part of the construction that is in violation shall be determined in accordance with Article 20 of the Building and Regulating of Cities and Villages Regulation No. 136 of 2016 and its amendments</p> <p>Fees payable to the Civil Defense Directorate:</p> <p>The fees are determined in accordance with the Collection of Fees for the Services of the of Civil Defense Directorate Regulation No. 128 of 2015 and its amendments</p>
Required duration	15 working days if the prepared drawings comply with the regulatory requirements
The final output	Issuance of an occupancy permit

Relevant legislation	Procurement Law No. 12 of 1987 Jordanian National Building Law No. 7 of 1993 and its amendments Cities, Villages and Buildings Regulation Law No. 79 of 1966 and its amendments Amended Building and Regulating of Cities and Villages Regulation No. 3 of 2017 Buildings and Planning Regulation in the City of Amman No. 28 of 2018 and its amendments The Building and Regulating of Cities and Villages Regulation and its amendments 136 of 2016 Jordan Engineers Association Law No. 15 of 1972 Practice of the Engineering Profession Regulation No. 22 of 1999 Engineering Offices and Companies Regulation No. 28 of 2016 Environmental Protection Law No. 6 of 2017 Environmental Impact Assessment Regulation No. 37 of 2005 Instructions for selecting locations of development activities for the year 2018 Environmental Classification and Licensing Regulation No. 69 of 2020 Instructions for the application of codes in all phases of design, implementation, supervision, maintenance, operation, public safety works and all related engineering works for the year 2004 Instructions for the application of engineering codes at all stages of engineering works related to the technical requirements of public safety conditions to be provided for construction excavation/ earthworks for construction projects in the Kingdom for the year 2018 Antiquities Law No. 21 of 1988 Public Security Law No. 38 of 1965 (as amended in 2020) Civil Defense Law No. 18 of 1999 and its amendments The fees are determined in accordance with the Collection of Fees for the Services of the of Civil Defense Directorate Regulation No. 128 of 2015 and its amendments
Additional information	The issued occupancy permit is valid for one year

### Step 5: obtaining sectoral licenses

#### Industrial sector

The economic activities in the industrial sector provided through the authorized representatives of the related entities at the Comprehensive Investment Service and according to the National Guide for the Classification of Economic Activities JORSIC are as follows:

- 10 Manufacture of food products
- 11 Beverage making
- 12 Manufacture of tobacco products
- 13 Manufacture of textiles
- 14 Manufacture of clothes
- 15 Manufacture of leather and leather products
- 16 Manufacture of wood, wood products, cork, excluding furniture; manufacture of varieties of straw and plaiting materials
- 17 Manufacture of paper and paper products
- 18 Printing and reproduction of recorded media
- 19 Manufacture of Coke and refined petroleum products
- 20 Manufacture of chemicals and chemical products
- 21 Manufacture of basic pharmaceutical products and pharmaceuticals
- 22 Manufacture of rubber and plastic products
- 23 Manufacture of other nonmetallic minerals products
- 24 Manufacture of basic metals
- 25 Manufacture of wrought metal products, excluding machinery and equipment
- 26 Manufacture of computers, electronic products and optical products
- 27 Manufacture of electrical equipment
- 28 Manufacture of unclassified machinery and equipment
- 29 Manufacture of motor vehicles, trailers and semi-trailers
- 30 Manufacture of other transportation equipment
- 31 Manufacture of furniture
- 32 other manufacturing industries

Note: the prohibited or restricted economic activities (activity name and number) are mentioned in the profile of each activity listed below

## Manufacture of food products

<b>Industrial sector</b>			
Service name/ purpose	<p>Application to establish new projects in the food industry</p> <p>Excluding for the production and refining of olive oil (olive press) (104011) a sectoral license is required from the Ministry of Agriculture)</p> <p>Non-automated bakery (107111) closed activity Automatic bakery (107112) closed activity</p> <p>This service is divided into two phases: The site approval phase for a food products project (through the authorized representative at the Comprehensive Investment Service) The production line approval phase (these services are currently provided outside the scope of the Comprehensive Investment Service and are provided directly through the Jordan Food and Drug Administration)</p>		
The relevant entity	<p>Phase one: the Jordan Food and Drug Administration, JFDA, through the authorized representative at the Comprehensive Investment Service</p> <p>Phase two: directly with the Jordan Food and Drug Administration, JFDA</p>	<p>Ministry of Investment website: <a href="http://www.moin.gov.jo">www.moin.gov.jo</a></p> <p>Website (JFDA): <a href="http://www.jfda.jo">www.jfda.jo</a></p>	
Economic activity according to the National Directory of Classification of Economic Activities, JORSIC	Manufacture of food products	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	10
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial The land must have a classified regulated land used that is appropriate to the nature or purpose of the intended project</p> <p>For approval of production lines: phase two Readiness of the facility for production lines and for inspection by the Jordan Food and Drug Administration inspectors</p>		
Pre-approvals and prerequisites (if any)	Environmental approval for the proposed site and an environmental permit (an initial or comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments		

Required documents	<p>To approve a site for a food production project: phase one Through the authorized representative at the Comprehensive Investment Service</p> <p>A filled in application form requesting an approval to establish a food factory/ plant An environmental approval (issued by the Ministry of Environment/ Environmental Approval Committee) A recent trade register listing all manufacturing purposes compatible with the environmental approval granted to the facility A recent site regulatory plan issued no longer than a year ago (from municipalities or Greater Amman Municipality) showing the regulatory requirements for the parcel Land parcel plan Croquis of the site plan/ building plans (if the building is built) Authenticated lease agreement or land title register (if the applicant owns the site) A vocation license if the licenses were issued before 2012 An official authorization from the relevant stakeholders + a copy of the applicant's proof of identity (if necessary).</p> <p>To approve or add production lines: phase two Apply directly to the Jordan Food and Drug Administration</p> <p>Fill in the approval/ adding application form for production lines A recent trade register that includes the purposes contained in the environmental approval An official authorization from the relevant entities + a copy of the applicant's proof of identity The site approval letter for the facility is issued by the Jordan Food and Drug Administration (phase one) A vocation license for those establishments existing prior to 2020 and excluded from the site approval letters Letters of approval of previous production lines (if additional production lines are requested) A recent vocation license Technical consultation letter for the product profile issued by the Jordan Food and Drug Administration Trademark registration certificate approved by the Ministry of Industry, Trade and Supply Filling in a food product description profile/ card Approvals for packaging materials (approval of packaging materials as food contact material) Approvals for food additives (additives such as flavors, coloring and preservatives. etc., if applicable) Approvals for special foods (for products classified as special foods) Manufacturing agreement if the manufacturing will take place in another factory under an agreement Rodent and insect control contract/ drawings showing the distribution of traps for insects and rodents (if necessary)</p>
The forms used	<p>Application form requesting the approval for establishing a food factory/ plant Application form for the approval/ addition of production lines</p>

<p>Procedures / action steps</p>	<p>To approve a site for a food manufacturing project: phase one Through the authorized representative at the Comprehensive Investment Service</p> <p>The applicant (the investor or his/ her authorized representative) fills out the required form and delivers the application to the relevant JFDA employee after filling out the data and checking that all the necessary requirements and documents are complete</p> <p>The collected fees are determined based on the Food Control Fee Regulation approved by the Jordan Food and Drug Administration and the application is transferred to the JFDA Bureau (Diwan) for registration</p> <p>The application is received by the relevant JFDA employee for checking and the preparation of a site approval letter for the new food manufacturing project upon approval of the procedures and the approval letter is duly issued</p> <p>To approve or add production lines: phase two Directly through the Jordan Food and Drug Administration</p> <p>After the site approval is issued, the applicant (the investor or his/ her authorized representative) fills in the required form and submits the application to the relevant JFDA employee upon filling in the required data and checking that all the requirements and documents necessary to complete the application are fulfilled</p> <p>Fees are collected according to the Jordan Food and Drug Administration approved Food Control Fees Regulation with the application then transferred to the Bureau (Diwan) for registration</p> <p>After registration, the relevant JFDA employee receives the application and checks it and if it is approved, a site inspection assessing the health situation is coordinated for</p> <p>Assessment of production lines for validation or addition purposes is in accordance with health inspection procedures for food factories and plants for licensing purposes</p> <p>Samples of factory products are collected (from the trial production) after the facility has met the health requirements according to the field visit results</p> <p>The appropriate letter of approval/ addition of production lines is issued (after checking the application and assuring the validity of the experimental production)</p>
<p>Fees</p>	<p>JOD 100 for an application requesting an approval for a food factory/ plant site according to the Food Control Fees Regulation applicable to the establishment</p> <p>JOD 100 for each production line upon inspection and assessment of the facility production lines</p>
<p>Required duration</p>	<p>To approve a site for a food project: phase one Two working days from the date of submission of the completed application documents in compliance with terms and conditions and the payment of the fees</p> <p>To approve production lines: phase two Two weeks from the date of submission of a completed application with the documents attached provided that the samples taken have passed the laboratory tests (proven viability of the food product)</p>
<p>The final output</p>	<p>Issuance of a site approval letter for the new food product facility</p> <p>Issuance of a production line/ adding production lines approval letter</p>

<p>Relevant legislation</p>	<p>Environmental Protection Law No. 6 of 2017  Environmental Impact Assessment Regulation No. 37 of 2005  Instructions for Site Selection of Development Activities of 2018  Environmental Classification and Licensing Regulation No. 69 of 2020  Food Law No. 30 of 2015  Food Control Fees Regulation No. 58 and its amendments of 2008  Guide to Good Manufacturing Practices for Food  (Good Manufacturing Practice, GMP, In Food) issued by the Board of Directors of the JFDA at meeting No. 39, dated 29/12/2015  Instructions for the transportation, storage and display of food items for the year 2011 published in the Official Gazette No. 5092 dated 16/5/2011  Relevant instructions issued by the Jordan Food and Drug Administration  General health provisions for licensing factories and plants published in the Official Gazette No. 4075 dated 16/10/1995  Jordanian Technical Rule No. 493/ 2003 specific to health requirements- general rules for food hygiene  Jordanian Technical Rule No. 1716/2006 – Food Safety Management Systems- requirements for any facility in the food production chain</p>
<p>Additional information</p>	<p>After the facility receives a site approval letter from the Jordan Food and Drug Administration, the production permit (phase two) must be obtained as described above.  It is prohibited to practice any industrial activity that is not listed among the permitted activities in the attached environmental approval  In accordance with the provisions of Chapter Five of the Investment Environment Law, the relevant government entities will review their legislation so that transactions related to the Comprehensive Investment Service are completed within a period not exceeding 15 working days from the date of receipt of the application that is complete and in compliance with all the requirements</p>

### Production and refining of olive oil (olive press)

This service is currently provided outside the scope of the Comprehensive Investment Service and the application is made directly and in person through the relevant entities.

Industrial sector			
Service name / purpose	Olive oil production and refining (Olive Press) - includes the processes of pressing, oil production and bottling		
The relevant entity	Ministry of Agriculture/ Olives Directorate	The website: www.moa.gov.jo	
Economic activity according to the National Directory of Classification of Economic Activities, JORSIC	Production and refining of olive oil (olive press)	Economic activity according to the National Directory of Classification of Economic Activities, JORSIC	104011
Conditions for obtaining the service	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>Please refer to the instructions regarding the licensing of the establishment and operation of the Olive Press No. k/10 of 2021</p> <p>To view more provisions – please click on the Regulation Here</p>		
Pre-approvals and prerequisites (if any)	<p>Approval of the Environmental Approvals Committee</p> <p>Environmental approval for the site and an environmental permit (an initial or comprehensive environmental impact assessment study is needed) according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p> <p>Approval of the Ministry of Water and Irrigation</p> <p>Approval of the Jordan Food and Drug Administration</p>		

Required documents	<p>Documents required to establish an olive press for the first time:  Submit a request letter to establish and operate an olive press  Certificate of registration(trade register?) from the Companies Control Department at the Ministry of Industry, Trade and Supply  Chamber of Industry membership certificate  General Syndicate of Contemporary Owners of Jordanian Olive Producers membership certificate  A recent land title register for the land parcel the olive press is intended to be established on  A recent land plan for the land parcel the olive press is intended to be established on  Cadastral site coordinates provided by the Department of Lands and Survey  A recent site regulatory plan for the land parcel the olive press is intended to be established on  A lease for a period of at least ten years if the land is rented  Engineering drawings authenticated according to the regulatory planning provisions  A vocation license from Greater Amman Municipality or the relevant entity  An initial economic feasibility study for the establishment of an olive press in the area, submitted by the applicant</p> <p>Documents required to operate an olive press for the first time:  An authenticated croquis drawing and the site cadastral coordinates of the olive press drawn up by a licensed surveyor  The catalogs of the production line/lines to be installed, indicating their type and production capacity, accompanied by a certificate from the manufacturer indicating the parts of the olive press lines (piston and separator) and that they are new (not used)/ or a letter from the General Syndicate of Contemporary Owners of Jordanian Olive Producers indicating the efficiency of production lines and presses  An occupancy permit from Greater Amman Municipality or the relevant municipality or entity  A vocation license from the Greater Amman Municipality or the relevant entity  Registration certificate (trade register?) from the Companies Control Department at the Ministry of Industry, Trade and Supply  A building permit</p>
Forms	Request letter form requesting the establishment and licensing A license form Site visit report form
Procedures/ action steps	A request letter submitted by the person concerned to the public services desk The request is transferred to the Olive Directorate The submitted documents are studied by the committee members and a report is written on their compliance with applicable provisions and legislation A site visit is conducted by the relevant committee The applicant is informed of the committee decision to approve/ reject and if an approval to establish the project is granted, it is valid for one year and extendable for a further year upon a committee review of its current state
Fees	JOD 25
Required duration	Two months
The final output	A license to establish and operate an olive press, or the investor/ farmer is informed of the missing information or procedures that need to be completed
Relevant legislation	Environmental Protection Law No. 6 of 2017 Environmental Impact Assessment Regulation No. 37 of 2005 Instructions for Site Selection of Development Activities of 2018 Environmental Classification and Licensing Regulation No. 69 of 2020 Agriculture Law No. 13 of 2015 and its amendments Instructions for licensing and operating Olive Presses No. k/10 of 2021 Agricultural Services Fee Decision No. k/9 of 2015 and its amendments The provisions for granting the placement of foreign workers and the approved holdings tables/ lists, in accordance with the Minister of Agriculture letter No. 10/7/20/10852 dated 23/9/2021 and in coordination with the Ministry of Labor

Additional information	<p>These procedures -the sectoral license apply also to the following trade activities: Import and export of nitrogen and phosphate fertilizers (461030) Wholesale trade of fertilizers and agrochemical products (466901) Retail trade of flowers, natural and artificial plants and agricultural materials (477332)</p> <p>In accordance with the provisions of Chapter Five of the Investment Environment Law, the relevant government entities will review their legislation so that transactions related to the Comprehensive Investment Service are completed within a period not exceeding 15 working days from the date of receipt of the application that is complete and in compliance with all the requirements</p>

Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of beverages (Alcoholic)	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	11
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial The land must have a classified regulated land used that is appropriate to the nature or purpose of the intended project</p> <p>For approval of production lines: phase two Readiness of the facility for production lines and for inspection by inspectors of the Jordan Food and Drug Administration</p>		
Pre-approvals and prerequisites (if any)	<p>Approval of the Ministry of Interior Approval of the Environmental Approvals Committee Environmental approval for the site and an environmental permit (initial environmental impact assessment study is needed here), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		

Required documents	<p>For the approval of the Ministry of Interior  Certificate of good conduct  A recent trade register whereby it includes the purposes mentioned in the environmental approval for the facility  A copy of the passport  A filled in details form/ personal data statement  Account statement showing financial solvency  To approve a site for a food product project: phase one  Through the authorized representative at the Comprehensive Investment Service</p> <p>Fill in the approval application form for the establishment of a food factory / laboratory  Approval of the Ministry of Interior  Environmental approval (issued by the Ministry of Environment/ Environmental Approvals Committee)  A recent trade register that lists all the manufacturing purposes that should also be compatible with the environmental approval of the facility  A recent land parcel site regulatory plan issued no longer than a year to date (from municipalities or Greater Amman Municipality).  Land parcel site plan  Croquis site plan/ building drawings (if the building is already built)  Authenticated lease agreement or land title register (if the land is owned by the investor)  An official authorization from the relevant stakeholders + a copy of the applicant's proof of identity (if necessary).</p> <p>For approval of production lines: phase two  Directly through the Jordan Food and Drug Administration</p> <p>Fill in the approval/ add production lines application form  A recent trade register whereby it includes the purposes mentioned in the environmental approval for the facility  An official authorization from the relevant entities + a copy of the applicant's proof of identity.  The site approval letter for the facility is issued by the Jordan Food and Drug Administration (phase one)  A vocation license for establishments existing before 2020 and excluded from site approval letters  Letters of approval of previous production lines (if the request is to add new production lines)  A recent vocation license  Technical consultation letter for the issued product profile from the Jordan Food and Drug Administration, JFDA.  A trademark registration certificate approved by the Ministry of Industry, trade and Supply  Filling in a food product description profile (food product description card).  Approvals of packaging materials (approval of packaging materials as a contact material for food).  Approvals for food additives (additives such as flavors, coloring and preservatives. etc., if applicable)  Approvals for special foods (if the product is classified as a special food).  Manufacturing agreement in the case of manufacturing in another factory under an agreement.  Rodent and insect control contract/ insects and rodents trap distribution drawings (if necessary).</p>
The forms used	<p>Application form for approval of the establishment of a food factory/ plant.  Application form for approval/ addition of production lines</p>

Procedures/ action steps	<p>For approval of the Ministry of Interior  Filling out an application for the manufacture of alcoholic beverages with the authorized representative of the Ministry of Interior at the Comprehensive Investment Service  The authorized representative sends letters to the relevant entities  Issuing the final approval or rejection from the Ministry of Interior</p> <p>To approve a site for a food product project: phase one  Through the authorized representative of the Comprehensive Investment Service</p> <p>The applicant (the investor or his/ her authorized representative) fills in the required form and delivers the application to the relevant JFDA employee after filling in the data and making sure that all the requirements and documents necessary for the completion of the application are completed  Fees are collected in accordance with the Food Control Fees Regulation and the application is transferred to the Jordan Food and Drug Administration Bureau (Diwan) for registration  The application is received after its registration by the relevant JFDA employee who checks it and a site approval letter is prepared for the new food establishment upon approval of the procedures and the approval letter is duly issued</p> <p>For approval of production lines: phase two  Directly through the Jordan Food and Drug Administration</p> <p>After the site approval is issued, the applicant (the investor or his/ her authorized representative) fills in the required form and submits the application to the relevant JFDA employee upon filling in the required data and checking that all the requirements and documents necessary to complete the application are fulfilled  Fees are collected according to the Jordan Food and Drug Administration approved Food Control Fees Regulation with the application then transferred to the Bureau (Diwan) for registration  After registration, the relevant JFDA employee receives the application and checks it and if it is approved, a site inspection assessing the health situation is coordinated for  Assessment of production lines for validation or addition purposes is in accordance with health inspection procedures for food factories and plants for licensing purposes  Samples of factory products are collected (from the trial production) after the facility has met the health requirements according to the field visit results  The appropriate letter of approval/ addition of production lines is issued (after checking the application and assuring the validity of the experimental production)</p>
Fees	<p>JOD 100 fees for the approval of a food site/ factory or plant in accordance with the Jordan Food and Drug Administration approved Food Control Fees Regulation  JOD 100 for each production line upon conducting a site visit and assessment of the facility production lines</p>
Required duration	<p>For an approval from the Ministry of Interior: 5 working days</p> <p>To approve a site for a food product project: phase one  Two working days from the date of submission of the completed application documents in compliance with terms and conditions and the payment of the fees</p> <p>For approval of production lines: phase two  Two weeks from the date of submission of the application, the documents are completed and provided that the experimental samples have passed laboratory testing (proving the validity of the food product)</p>
The final output	<p>Issuance of a site approval letter for the new food facility  Issuance of a letter of approval of production lines/ addition of production lines</p>

<p>Relevant legislation</p>	<p>Companies Law No. 22 of 1997 and its amendments  Environmental Protection Law No. 6 of 2017  Environmental Impact Assessment Regulation No. 37 of 2005  Instructions for Site Selection for Development Activities for the year 2018  Environmental Classification and Licensing Regulation No. 69 of 2020  Food Law No. 30 of 2015  Food Control Fees Regulation No. 58 of 2008 and its amendments  Guide to Good Manufacturing Practices in food  Good Manufacturing Practice in Food, GMP, issued by the Board of Directors of the Jordan Food and Drug Administration at its 39th meeting dated 29/12/2015  Instructions for the transportation, storage and display of food items for the year 2011 published in the Official Gazette No. 5092 dated 16/5/2011  General health provisions for licensing factories and plants published in the Official Gazette No. 4075 dated 16/10/1995.  Jordan Technical Rule No. 493/ 2003 specific to health provisions-general rules for food hygiene  Jordan Technical Rule No. 1716/2006 –food safety management systems-requirements for any facility in the food chain.  The relevant instructions issued by the Jordan Food and Drug Administration.</p>
<p>Additional information</p>	<p>The practice of any industrial activity that is not listed among the permitted activities within the attached environmental approval is not allowed  The granted site approval is not a substitute for the letter of approval of production lines</p> <p>In accordance with the provisions of Chapter Five of the Investment Environment Law, the relevant government entities will review their legislation so that transactions related to the Comprehensive Investment Service are completed within a period not exceeding 15 working days from the date of receipt of the application that is complete and in compliance with all the requirements</p>

## Manufacture of tobacco products

<b>Industrial sector</b>			
Service name/ purpose	Tobacco products industry Making cigarettes, manufacturing and packing shisha molasses and shisha tobacco of all kinds, manufacturing tobacco substitute products		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of tobacco products	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	12
Special conditions	Please refer to Annex 1 for site selection requirements for development activities Land use classification: Industrial The approval of the Environmental Approvals Committee is required		
Additional information	The tobacco products industry is suspended based on the Cabinet Decision expressed in the Prime Ministry letter No 13/ 16/ 2/ 22812 dated 25/9/2018, that included the suspension of investment approvals in the field of tobacco, cigarettes and shisha molasses industry until further notice		

## Manufacture of textiles

<b>Industrial sector</b>			
Service name / purpose	The manufacture of textiles, spinning and weaving, the manufacture of threads and fabrics, blankets, curtains, flags, banners, rugs, carpets, ropes, nets, and traditional male headdress.		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of Textiles	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	13
Special conditions	Please refer to Annex 1 for site selection requirements for development activities Land use classification: Industrial An environmental approval for the site is required and an environmental permit (an initial or comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments		
Additional information			

## Manufacture of clothes

Industrial sector			
Service name / purpose	Manufacture of clothes. sportswear, uniforms, tailoring, sewing and knitting clothes to order (sewing business), making clothes from knitwear, crochet, embroideries.		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacturing of clothes	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	14
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required</p>		
Additional information			

## Manufacture of leather and leather products

Industrial sector			
Service name / purpose	Manufacture of leather and its products, tanning and priming of leather; manufacture of luggage bags, handbags, saddles and reins; priming and dyeing of fur, cobblery		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of leather and leather products	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	15
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required</p> <p>An environmental site approval and an environmental permit are required (an initial or comprehensive environmental impact assessment study is needed), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		
Additional information			

Manufacture of wood, wood products, cork, excluding furniture; manufacturing varieties of straw and plaiting materials

<b>Industrial sector</b>			
Service name / purpose	The manufacture of wood, cork and its products, chips from wood veneer and planks made of wood, carpentry products necessary for construction work, wooden vessels, wooden shoe molds, wooden windows shutters, wooden frames, artificial firewood, varieties of cork varieties, straw and plaiting materials.		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of wood, wood products, cork, excluding furniture; manufacture of straw items and plaiting materials	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	16
Special conditions	Please refer to Annex 1 for site selection requirements for development activities Land use classification: Industrial The approval of the Environmental Approvals Committee is required		
Additional information			

## Manufacture of paper and paper products

<b>Industrial sector</b>			
Service name / purpose	<p>Manufacture of paper and paper products, making paper pastes and paper sheets, cardboard (corrugated paper), cardboard and cardboard containers, sanitary paper products, paper stationery products, copy paper and ready-to-use carbon paper of various sizes and manufacturing wallpaper.</p> <p>Excluding for the manufacture of plates, cups, paper and cardboard trays (170920) (requires a sectoral license from the Jordan Food and Drug Administration, JFDA)</p>		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of paper and paper products	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	17
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required An environmental site approval and an environmental permit (an initial or comprehensive environmental impact assessment study is needed), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		
Additional information			

Industrial sector	
Service name/ purpose	<p>Manufacture of food contact packaging products, paper and cardboard plates, cups, trays and plastic</p> <p>Application for an approval to establish a factory/ plant for the manufacture of packaging materials intended for contact with food (paper, cardboard and plastic)</p> <p>This service is divided into two phases:  The site approval for a food product project phase (through the authorized representative at the Comprehensive Investment Service)  The approval of production lines phase (these services are currently provided outside the scope of the Comprehensive Investment Service and are provided directly through the Jordan Food and Drug Administration)</p>
The relevant entity	<p>Phase one: the Jordan Food and Drug Administration through the authorized representative at the Comprehensive Investment Service</p> <p>Phase two: directly through the Jordan Food and Drug Administration</p> <p>Ministry of investment website: www.moin.gov.jo</p> <p>Website (JFDA): www.jfda.jo</p>
Economic activity according to the National Directory of Classification of Economic Activities	<p>Manufacture of paper and cardboard plates, cups, trays</p> <p>Activity number according to the National Directory of Classification of Economic Activities, JORSIC</p> <p>170920</p> <p>222021</p> <p>222022</p> <p>222023</p> <p>222051</p>
	Manufacture of plastic bags (contact with food)
	Manufacture of plastic packaging products (contact with food)
	Manufacture of plastic containers and bottles (contact with food)
	Manufacture of disposable plastic utensils for food and tableware
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial  The land must have a classified regulated land used that is appropriate to the nature or purpose of the intended project</p> <p>For approval of production lines: phase two  Readiness of the facility for production lines and for inspection by the Jordan Food and Drug Administration inspectors</p>
Pre-approvals and prerequisites (if any)	Environmental approval of the site and an environmental permit (required to conduct an initial environmental impact assessment study), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments

<p>Required documents</p>	<p>To approve a site for a food project: phase one Through the authorized representative at the Comprehensive Investment Service</p> <p>Fill in the application form for approval of the establishment of a food factory/ plant. Environmental approval (issued by the Ministry of Environment/ Environmental Approvals Committee). A recent trade register that includes all manufacturing purposes and is compatible with the environmental approval of the facility. A recent site regulatory plan issued no more than a year prior to the submission of the application (from the municipalities or Greater Amman Municipality) showing the land use classification and regulations Land parcel plan A croquis of the site/ construction drawings (if the building already exists) Authenticated lease agreement or land title register (if the land is owned by the investor) An official authorization from the relevant stakeholders + a copy of the applicant's proof of identity (if necessary)</p> <p>For approval of production lines: phase two Directly through the Jordan Food and Drug Administration, JFDA</p> <p>Fill in the approval/ add production lines application form An official authorization from the relevant entities + a copy of the applicant's proof of identity (if necessary) The site approval letter for the facility is issued by the Jordan Food and Drug Administration (phase one) A list of raw materials used in production Jordan Food and Drug Administration approval of raw materials or local purchase invoices A list of equipment and machines used in production (if necessary) The brand of products The flow chart of the production process (production steps according to the principles of good manufacturing methods and the HACCP system)</p>
<p>The forms used</p>	<p>Application form for approval of the establishment of a food factory/plant Application form for approval/ addition of production lines</p>

Procedures/ action steps	<p>To approve a site for a food project: phase one Through the authorized representative at the Comprehensive Investment Service</p> <p>The applicant (the investor or his/ her authorized representative) fills in the required form and delivers the application to the relevant JFDA employee after filling in the data and making sure that all the requirements and documents necessary for the application are complete Fees are collected in accordance with the Food Control Fees Regulation and the application is then transferred to the JFDA Bureau (Diwan) for registration The application is received by the relevant JFDA employee who checks it and a site approval letter is prepared for the new food establishment upon approval of the procedures and the approval letter is duly issued</p> <p>For approval of production lines: phase two Directly through the Jordan Food and Drug Administration</p> <p>The applicant (the investor or his/ her authorized representative) fills in the required form and delivers the application to the relevant JFDA employee after filling in the data and making sure that all the requirements and documents necessary for the completion of the transaction are completed Fees are collected in accordance with the Food Control Fees Regulation and the application is transferred to the JFDA Bureau (Diwan) for registration The application is received by the relevant JFDA employee who checks it and if approved a site visit is coordinated for assessing the health situation Assessment of production lines in order to allow the operation of production lines for a filling and packaging plant (production readiness) A letter of approval of production lines by the relevant JFDA employee is prepared and duly issued</p>
Fees	<p>JOD 100 fees for the approval of a food site/ factory or plant, based on the JFDA adopted Food Control Fees Regulation JOD 100 for each production line upon conducting a site visit and assessment of the facility production lines</p>
Required duration	<p>To approve a site for a food project: phase one Two working days from the date of submission of the completed transaction documents, compliance with requirements and the payment of fees</p> <p>For approval of production lines: phase two Two weeks from the date of submission of the completed application documents.</p>
The final output	<p>Issuing a site approval letter for the new food facility (manufacturing of packaging products intended for contact with food) Issuing a letter of approval/ adding of production lines.</p>
Relevant legislation	<p>Companies Law No. 22 of 1997 and its amendments Environmental Protection Law No. 6 of 2017 Environmental Impact Assessment Regulation No. 37 of 2005 Instructions for Site Selection for Development Activities for the year 2018 Environmental Classification and Licensing Regulation No. 69 of 2020 Food Law No. 30 of 2015. Food Control Fees Regulation No. 58 of 2008 and its amendments Guide to Good Manufacturing Practices in food (Good Manufacturing Practice in Food, GMP) issued by the Board of Directors of the JFDA at its 39th meeting dated 29/12/201. Instructions for the transportation, storage and display of food items for the year 2011 published in the Official Gazette No. 5092 dated 16/5/2011 General health provisions for licensing factories and plants published in the Official Gazette No. 4075 dated 16/10/1995 Jordan Technical Rule No. 493/ 2003 specific to health provisions-general rules for food hygiene Jordanian Technical Rule No. 1716/2006 –food safety management systems-requirements for any facility in the food chain The relevant instructions issued by the Jordan Food and Drug Administration.</p>

Additional information	<p>The practice of any industrial activity that is not listed among the permitted activities within the attached environmental approval is not allowed The granted site approval is not a substitute for the production lines letter of approval</p> <p>In accordance with the provisions of Chapter Five of the Investment Environment Law, the relevant government entities will review their legislation so that transactions related to the Comprehensive Investment Service are completed within a period not exceeding 15 working days from the date of receipt of the application that is complete and in compliance with all the requirements</p>

### 3. Printing and reproduction of recorded media

<b>Industrial sector</b>			
Service name/ purpose	Printing of books, magazines, periodicals, specialized magazines, maps, atlases, textbooks, brochures, calendars, advertisements, cards including printing posters, information flyers, wedding cards, printing promotional materials (on non-paper materials), preparation of plates and templates for stamps (stamp/ seal making), typesetting, electronic processing of printing, Braille printing services, other printing services activities, copying (reproduction) of pre-recorded audio recordings, reproduction of computer software, reproduction of other recorded media activities.		
Pre-registration approvals	Preparation of plates and molds for stamps/ seals (manufacture of seals 181140/ require a noncriminal record certificate		
Economic activity according to the National Directory of Classification of Economic Activities	Printing and reproduction of recorded media	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	18
Special conditions	<p>Please refer to Annex1, which contains the requirements for the selection of sites for development activities.</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required An environmental approval for the site and an environmental permit is required (an initial or comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		
Additional information			

## Manufacture of Coke and refined petroleum products

<b>Industrial sector</b>			
Service name / purpose	The activities of making Coke coal furnace products (production of solid fuels), petroleum refinery activities (production of fuels), oil production from oil shale, manufacture of petroleum lubricants and greases, manufacture of road covering materials and oils from petroleum, manufacture of other petroleum products (manufacture of white alcohol, petroleum jelly, petroleum waxes such as paraffin wax, petroleum gelatin, unprocessed biodiesel in oil refineries and manufacture of petroleum products for petrochemical industries), manufacture of briquettes of hard coal and lignite fuel briquettes.		
Pre-registration approvals	Manufacture of Coke coal furnace products (solid fuel production) 191000/ approval from the Ministry of Interior is required		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of Coke and refined petroleum products	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	19
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required An environmental approval for the site and an environmental permit (an initial or a comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		
Additional information			

## Manufacture of chemicals and chemical products

<b>Industrial sector</b>			
Service name/ purpose	<p>The manufacture of chemicals and chemical products, the manufacture of nitrogenous compounds, plastics and synthetic rubbers in primary forms, the production of industrial or medical inorganic gases, the manufacture of plastics and synthetic rubbers in their primary forms, the manufacture of sterilizers and antiseptics, the manufacture of paints, varnishes and similar coatings and pastes, the manufacture of soaps and detergents, cleaning and polishing preparations, perfumes and cosmetics, the manufacture of natural essential oils, the manufacture of engine and machine fluids and writing inks.</p> <p>Excluding for the manufacture of fertilizers (nitrogen and phosphate) (201210) (requires a sectoral license from the Ministry of Agriculture)                      Excluding for the manufacture of pesticides and agricultural chemical products (2021) (requires a sectoral license from the Ministry of Agriculture)                      The following activities need the approval of the Ministry of Interior                      Manufacture of explosives and pyrotechnic products 20291                      Manufacturing of industrial gases 20111                      Manufacture of inorganic chemicals 201130                      Manufacture of basic organic chemicals 201140                      Enrichment of uranium and thorium ore and production of fuel elements for nuclear reactors 201171                      Manufacture of radioactive materials 201172                      Manufacture of other basic chemicals 201190                      Manufacture of nitrogenous products 201220                      Manufacture of cellulose and its chemical derivatives 201340                      Manufacture of raw glycerol 202313                      Manufacture of explosive materials and pyrotechnic products 202911                      Manufacture of fireworks 202912                      Manufacture of explosives and other pyrotechnic products 202919                      Manufacture of other chemical products 202990</p>		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of chemicals and chemical products	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	20
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required                      An environmental approval for the site and an environmental permit (an initial or a comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		
Additional information			

Industrial sector			
Service name/ purpose	Manufacture of fertilizers (nitrogen and phosphate) - such as pure nitrogen, phosphate, potash or compound fertilizers; manufacture of urea, phosphate salts and natural potash.		
The relevant entity	Ministry of Agriculture / Directorate of Lands and Irrigation (the Ministry of Agriculture authorized representative at the Comprehensive Investment Service)	The website: www.moa.gov.jo	
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of fertilizers (nitrogen and phosphate)	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	201210
Conditions for obtaining the service	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>Please refer to the instructions for registration, production, import, analysis and sale of agricultural fertilizers and plant growth organizations No. k/6 of 2021</p> <p>To view more provisions – please click on the Regulation Here</p>		
Approvals and prerequisites (if any)	<p>Approval of the Environmental Approvals Committee</p> <p>A site approval and an environmental permit are both needed (an initial or comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		
Required documents	<p>A letter from the applicant requesting a license for the production of agricultural fertilizers</p> <p>Certificate of registration (trade register?) from the Companies Control Department at the Ministry of Industry, Trade and Supply</p> <p>A membership certificate from the Agricultural Materials Traders &amp; Producers Association of Jordan</p> <p>A vocation license from the Greater Amman Municipality, the relevant municipality or entity (Jordan Industrial Estates Corporation, JIEC)</p> <p>Certificate of analysis issued by a laboratory accredited by the Ministry (National Center for Agricultural Research, Royal Scientific Society, University of Jordan laboratories)</p> <p>Certificate of analysis of heavy elements for solid organic fertilizers</p> <p>Certificate that the fertilizer is free from bacteria, fungi and pest pathogens, a certificate of components of the finished product composition</p> <p>Technical bulletin</p> <p>Proposed sticker</p> <p>Letter of appointment of a qualified production manager</p>		
The forms used	<p>Production license application request form</p> <p>Agricultural fertilizer production permit form</p> <p>Site visit report form</p>		
Procedures/ action steps	<p>Registration of the request form/ letter with the authorized representative of the Ministry of Agriculture at the Comprehensive Investment Service</p> <p>Coordination with the Licensing and Registration of Fertilizer Production Committee to check the documents needed for the site visit</p> <p>Issuance of the site visit report and recommendations by the committee</p>		
Fees	JOD 60		
Required duration	5 – 7 days		

The final output	A license to produce agricultural fertilizers, or informing the investor or farmer of the existence of missing information/ documents or that some procedures need to be completed
Relevant legislation	<p>Environmental Protection Law No. 6 of 2017  Environmental Impact Assessment Regulation No. 37 of 2005  Instructions for Site Selection for Development Activities for the year 2018  Environmental Classification and Licensing Regulation No. 69 of 2020  Agriculture Law No. 13 of 2015 and its amendments  Instructions for provisions of registration, production, import, analysis and sale of agricultural fertilizers and plant growth regulators No. k/ 6 of 2012  Agricultural Services Fee Decision and amendments No. k/ 9 of 2015  The provisions for granting the placement of foreign workers and the approved holdings tables/ lists, in accordance with the Minister of Agriculture letter No. 10/7/20/10852 dated 23/9/2021 and in coordination with the Ministry of Labor</p>
Additional information	<p>These procedures - the sectoral license apply also to the following trade activities:  Import and export of nitrogen and phosphate fertilizers (461030)  Wholesale trade of fertilizers and agrochemical products (466901)  Retail trade of flowers, natural and artificial plants and agricultural materials (477332)</p>

Industrial sector			
Service name / purpose	Manufacture of pesticides, other agricultural chemical products, sterilizers, and disinfectants		
The relevant entity	Ministry of Agriculture/ Directorate of Prevention and Plant Health/ Pesticides Registration Department (authorized representative at the Comprehensive Investment Service)	The website: <a href="http://www.moa.gov.jo">www.moa.gov.jo</a>	
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of insecticides, rodenticides, grass and fungicides	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	202110
			202120
			202130
			202190
	Manufacture of sterilizers and disinfectants for agricultural and non-agricultural uses		
	Manufacture of growth regulators and fertilizers and anti-flowering products		
	Manufacture of other agrochemical products not classified elsewhere		
Conditions for obtaining the service	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>Please see the instructions for registration, production, import, analysis and sale of agricultural fertilizers and plant growth regulators No. k/6 of 2021 To view more provisions - please click on the Regulation <a href="#">Here</a></p> <p>Please view the instructions for registration, manufacture, processing, import, trade and handling of pesticides No. k/ 7 of 2021 To view more provisions - please click on the Regulation <a href="#">Here</a></p>		
Approvals and prerequisites (if any)	Approval from the Environmental Approvals Committee A site environmental approval and an environmental permit (an initial or comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments		
Required documents	<p>A letter requesting a license for the production of agricultural fertilizers</p> <p>Certificate of registration (trade register?) from the Companies Control Department at the Ministry of Industry, Trade and Supply</p> <p>A membership certificate from the Agricultural Materials Traders &amp; Producers Association of Jordan</p> <p>A vocation license from Greater Amman Municipality, the relevant municipality or entity (Jordan Industrial Estates Corporation, JIEC)</p> <p>Certificate of analysis issued by a laboratory accredited by the Ministry (National Center for Agricultural Research, Royal Scientific Society, University of Jordan laboratories).</p> <p>Technical sheet</p> <p>Proposed sticker</p> <p>Letter of appointment of a production manager with an academic qualification</p>		

The forms used	Production license request form Application form for the production of agricultural fertilizers /or pesticides permit Site visit report form
Procedures/ action steps	Registration of the request form/ letter with the authorized representative of the Ministry of Agriculture at the Comprehensive Investment Service Coordination with the Licensing and Registration of Fertilizer Production Committee to check the documents needed for a site visit Issuance of the site visit report and recommendations by the committee
Fees	JOD 60 - for agricultural fertilizer factories JOD 300- for agricultural pesticide factories
Required duration	5 – 7 days
The final output	License for the production of fertilizers and agricultural growth regulators, or agricultural pesticides; informing the investor or farmer of the existence of missing information/ documents or procedures that need to be completed
Relevant legislation	Environmental Protection Law No. 6 of 2017 Environmental Impact Assessment Regulation No. 37 of 2005 Instructions for Site Selection for Development Activities for the year 2018 Environmental Classification and Licensing Regulation No. 69 of 2020 Agriculture Law No. 13 of 2015 and its amendments Instructions for provisions of registration, production, import, analysis and sale of agricultural fertilizers and plant growth regulators No. k/ 6 of 2012 Agricultural Services Fee Decision and amendments No. k / 9 of 2015 The provisions for granting the employment of foreign workers and the tables/ lists of holdings approved by the Minister of Agriculture letter No. 10/7/20/10852 dated 23/9/2021 in coordination with the Ministry of Labor
Additional information	These procedures-the sectoral license apply also to the following trade activities: Import and export of nitrogen and phosphate fertilizers 461030 Wholesale trading of fertilizers and agricultural chemical products 466901 Retail trade of flowers and natural and artificial plants 477332

Manufacture of basic pharmaceutical products and pharmaceutical preparations

<b>Industrial sector</b>			
Service name/ purpose	Application for a license for pharmaceutical factories		
The relevant entity	Jordan Food and Drug Administration	The website: www.jfda.jo	
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of basic pharmaceutical products and pharmaceutical preparations	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	21
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities Compliance with the environmental conditions mentioned in Article No. 6 of the Pharmaceutical Factories Licensing Regulation No. 11 of 2016. Compliance with the construction provisions for a factory or manufacturing plant according to Article No. 7 of the Pharmaceutical Factories Licensing Regulation No. 11 of 2016</p> <p>Land use classification: Industrial The land must have a classified regulated land used that is appropriate to the nature or purpose of the intended project</p>		
Pre- approvals and prerequisites (if any)	<p>Obtain an initial approval from the relevant planning regulatory committee to allow using the land or building for industrial purposes for locations outside the boundaries of planned zoned regulated areas An approval from the Environmental Approvals Committee is required An environmental site approval and an environmental permit (an initial environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		

Required documents	<p>Fill out a pharmaceutical factory license application form with the following documents attached:</p> <p>An official letter by the factory owner or the authorized representative requesting the licensing of the pharmaceutical factory</p> <p>Authenticated lease agreement or land title register</p> <p>Regulatory site plan for the land parcel (issued by Greater Amman Municipality or the relevant municipality)</p> <p>The proposed building area plan for the buildings provided by the company (a proposed building plan/ drawing showing the proposed area and the distribution of the factory's different sections).</p> <p>The company's registration certificate issued by the Ministry of Industry, Trade and Supply showing the company's purposes, including the manufacture of medication for human consumption.</p> <p>Provisional approval from the relevant planning regulatory committee to allow the use of the land or building for industrial purposes (issued by Greater Amman Municipality, the Ministry of Local Administration, free zones, or the entity relevant to the requested factory location).</p> <p>The cadastral coordinates of the land parcel issued by the Department of Lands and Survey.</p> <p>A land parcel plan issued by the Department of Lands and Survey.</p> <p>A croquis plan showing the proposed location of the land parcel on which the proposed factory will be built, issued by a licensed surveyor</p>
The forms used	<p>Pharmaceutical factory license application form (Annex 1 of the Instructions for Licensing Pharmaceutical Factories for the year 2018)</p>

Procedures/ action steps	<p>The applicant (the investor or his/ her authorized representative) fills in the application form for a pharmaceutical factory license, attached with the required documents, and submits it to the Directorate of Medicine – the Department of Drug Control and Inspection</p> <p>The application is transferred to the Pharmaceutical Factories Licensing Committee for review of the submitted documents and to verify that the conditions set out in Article 6 of the Pharmaceutical Factories Licensing and Fee Regulation of the year 2016</p> <p>If the site does not comply with the requirements, the committee submits its recommendations not to approve the factory license to the Director General</p> <p>If the site complies with the requirements, the committee submits its recommendation to conduct the first site inspection of the factory site to verify its compliance with the provisions and forms a team from among its members to conduct the inspection in accordance with the instructions for Licensing Pharmaceutical Factories for the year 2018</p> <p>After the initial inspection and verification of the fulfillment of the conditions, an initial approval is issued by the committee for the establishment of the factory</p> <p>Upon completion of the construction of the factory, the owner or his/ her authorized representative submits a request to the Directorate to conduct a second inspection, and this is submitted to the committee</p> <p>The second inspection is carried out by a team of members of the Factories Licensing Committee to verify that the Pharmaceutical Factories Licensing Regulation provisions are met</p> <p>The investor pays the fees according to Instructions for Licensing Pharmaceutical Factories, 2018</p> <p>The committee submits its recommendations regarding the application meeting the conditions and provisions, to the Director General within 14 days from the date the second site visit is conducted</p> <p>The Director General submits his recommendation on the license application to the Chairman of the Board of Directors (Minister of Health) for the appropriate decision to be made, provided that this decision is issued within 30 days from the date of the site visit</p> <p>Note: (After the pharmaceutical factory has obtained a license certificate, the factory must comply with submitting the manufacturing main site file (Site Master File) according to the requirements outlined in the Pharmaceutical Manufacturing Site Approval, Re-evaluation and Cancellation Principles of 2016 to the Directorate of Medicine for the approval of the production line locations accompanied by the submission of the drug registration file (CTD File ) for the same line under review to be approved and alongside the file of the manufacturing site in order to obtain the drug registration certificate (الف.ل) before it is circulated in the local market, in accordance with the requirements of the Drug Registration Principles of 2015 and its amendments)</p>
Fees	<p>JOD 500 upon submitting an application for the establishment and licensing of a pharmaceutical factory</p> <p>JOD 4000 is paid upon granting a license to establish a pharmaceutical factory</p>
Required duration	<p>The first site visit/ inspection: Initial approval: within 15 working days from the date of the first site visit</p> <p>The second site visit: The committee submits its recommendations on eligible license applications to the Director General within 14 days from the date of the second site visit</p> <p>The Director General submits his recommendation on the license application to the Chairman of the Board of Directors (Minister of Health) for the appropriate decision to be made, provided that this decision is issued within 30 days from the date of site visit</p>
The final output	A license certificate for a pharmaceutical factory

<p>Relevant legislation</p>	<p>Environmental Protection Law No. 6 of 2017  Environmental Impact Assessment Regulation No. 37 of 2005  Instructions for Site Selection for Development Activities of 2018  Environmental Classification and Licensing Regulation No. 69 of 2020  The Regulation for Licensing Pharmaceutical Factories and the Fees to be Collected, 2016.  Instructions for licensing pharmaceutical factories, 2018.  Pharmaceutical Manufacturing Site Approval, Re-evaluation and Cancellation Principles of 2016</p>
<p>Additional information</p>	<p>The construction of the factory must be completed within a period not exceeding three years from the date of obtaining the building permit, unless a decision is issued by the Director General extending this period for a similar period based upon a justified request by the factory owner and a recommendation from the committee</p> <p>In accordance with the provisions of Chapter Five of the Investment Environment Law, the relevant government entities will review their legislation so that transactions related to the Comprehensive Investment Service are completed within a period not exceeding 15 working days from the date of receipt of the application that is complete and in compliance with all the requirements</p>

## Manufacture of rubber and plastic products

<b>Industrial sector</b>			
Service name / purpose	<p>Manufacture of rubber and plastic products, tires, pipes, hoses, plastic sheets, bags, packaging products, packages, flasks, polystyrene, construction supplies and plastic household items</p> <p>Activities that require a sectoral license from Jordan Food and Drug Administration</p> <p>Manufacture of plastic bags (food contact) 222021                      Manufacture of plastic packaging products (food contact) 222022                      Manufacture of plastic containers and bottles (food contact) 222023                      Manufacture of disposable plastic utensils for food and table 222051</p>		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of rubber and plastic products	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	22
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required                      An environmental site approval and an environmental permit are required (an initial or comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		
Additional information			

Manufacture of other non-metallic mineral products

<b>Industrial sector</b>			
Service name/ purpose	Manufacture of non-metallic mineral products (glass, ceramics, cement) Cutting, shaping and polishing stones (stone saw) 239610 closed activity Cutting and sawing marble and granite 239630 closed activity		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of other non-metallic mineral products	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	23
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required An environmental site approval and an environmental permit are required (an initial or comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		
Additional information	<p>According to the Cabinet Resolution No. 14416 dated 2016/3/12 concerning the extension of Resolution No. 835 containing "approval of a number of measures to regulate the work of the cement sector in the Kingdom", in Item 18 related to cement factories, the work of the cement sector has been regulated and primarily the registration, licensing or establishment of new cement factories and mills or the expansion of existing ones has been stopped, to reduce the surplus in cement production, therefore, the Directorate of Industrial Development at the Ministry of Industry, Trade and Supply should be consulted where there is a desire to invest in this sector so that a meeting of the relevant cement committee is held and the submitted application is duly considered</p>		

Manufacture of basic metals

<b>Industrial sector</b>			
Service name/ purpose	<p>The manufacture of primary iron and steel, the manufacture of wires, pipes and tubes of iron and steel, the production and purification of precious metals (except gold), the production of primary copper, the production of lead, zinc and tin, metal casting.</p> <p>The following activities need the approval of the Ministry of Interior                      Gold production and purification 242011                      Production and purification of precious metals (except gold) 242012                      Precious metal casting 242013</p>		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of basic metals	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	24
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required                      An environmental site approval and an environmental permit are required (an initial or comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		
Additional information			

Manufacture of wrought metal products, excluding machinery and equipment

Industrial sector			
Service name/ purpose	<p>Manufacture of structural metal products, tanks, storage tanks, steam generators, manufacture of synthetic, industrial and construction metal structures, manufacture of metal tanks and containers, metal processing and metal coating, manufacture of metal cutting tools, hand tools and general tools</p> <p>The following activities need the approval of the Ministry of Interior                      Manufacture of special equipment for nuclear reactors (except radioisotope separators) 251320 (also requires the approval of the Energy and Minerals Regulatory Authority)                      Manufacture of heavy weaponry (military equipment) 252010                      Manufacture of light weaponry 252020                      Manufacture of ammunition 252030                      The following activities require a noncriminal record certificate:                      Manufacture of locks, keys and metal hinges 259306</p>		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	<p>Manufacture of wrought metal products, excluding machinery and equipment</p> <p>Excluding the manufacture of weapons and ammunition (252)</p>	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	25
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required                      An environmental site approval and an environmental permit are required (an initial or comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		
Additional information			

Manufacture of computers, electronic and optical products

<b>Industrial sector</b>			
Service name/ purpose	<p>Manufacture of computers, electronic and optical products, boards, computer supplements, smart boards, wireless and mobile phones, alarms, radios and televisions, watches, electrotherapeutic medical devices, magnetic and optical media</p> <p>The following activities need a noncriminal record certificate:                      ATM and card reader industry 262030                      Manufacture of switchboards of all kinds 263011                      Manufacture of wireless and mobile phones and their equipment 263012                      Manufacture of fixed telephones, fax and answering machines 263013                      Manufacture of digital communication network equipment 263014                      Manufacture of telephone sets and other communication networks 263019                      Manufacture of radio and television broadcasting devices 263021                      Manufacture of wireless control devices (remote control) 263022                      Manufacture of surveillance and alarm systems and devices 263030                      Manufacture of other communication equipment 263090                      Manufacture of measuring, testing and monitoring equipment for natural phenomena and atmospheric monitoring 265101                      Manufacture of detection, search and location positioning and area calculation equipment 265103                      Manufacture of guidance for navigation and aviation 265104                      Manufacture of meters (for measuring liquids or distances) 265105</p> <p>The following activities need the approval of the Ministry of Interior:                      Manufacture of testing and monitoring equipment in security agencies 265107                      Manufacture of other measuring and control devices 265109</p>		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of computers, electronic and optical products	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	26
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required</p>		
Additional information			

Manufacture of electrical equipment

<b>Industrial sector</b>			
Service name/ purpose	Manufacture of electrical and thermal appliances, lighting equipment and batteries  The following activities need a noncriminal record certificate of: Manufacture of bells, door opening and closing devices, sirens 279001		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of electrical equipment	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	27
Special conditions	Please refer to Annex 1 for site selection requirements for development activities  Land use classification: Industrial  In cases of manufacturing:  The approval of the Environmental Approvals Committee is required An environmental site approval and an environmental permit are required (an initial or comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments In the case of assembly plants/ factories, a comprehensive environmental impact assessment is not required		
Additional information			

Manufacture of machinery and equipment (not classified)

<b>Industrial sector</b>			
Service name/ purpose	<p>Manufacture of machinery, engines, turbines, generators, pumps, heating and air conditioning units, furnaces, elevators, trucks and trailers, cranes, office machinery and equipment, hand tools, agricultural equipment, machines for mining, construction and construction operations, food processing machines in factories, textile and sewing machines</p> <p>The following activities need the approval of the Ministry of Interior:                      Manufacture of money counting machines and check writing machines 281713                      Manufacture of multi-purpose machines (others) 281990                      Manufacture of machines used in the manufacture of metals (metallurgy): machines and equipment for hot metal handling and rolling 282300                      Manufacture of machines for the preparation of tobacco and cigarettes 282523</p> <p>The following activities need a noncriminal record certificate:                      Making machines and tools for forming and manufacturing metals and their parts 282200</p>		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of unclassified machinery and equipment	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	28
Special conditions	<p>Please refer to Annex1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required                      An environmental site approval and an environmental permit are required (an initial or comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		
Additional information			

Manufacture of motor vehicles, trailers and semi-trailers

<b>Industrial sector</b>			
Service name/ purpose	Manufacture of motor vehicles, trailers and semi-trailer vehicles, manufacture and assembly of vehicle bodies, manufacture of shipping containers, armor plating of vehicles and cars, manufacture of mechanical parts and electrical and electronic equipment of motor vehicles		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of motor vehicles, trailers and semi-trailers	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	29
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required An environmental site approval and an environmental permit are required (an initial or comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		
Additional information			

Manufacture of other transportation equipment

<b>Industrial sector</b>			
Service name/ purpose	<p>Manufacturing other transportation equipment/ building ships and boats, building air and space vehicles, combat vehicles for military, motorcycles and bicycles, wheelchairs, strollers and other types of vehicles</p> <p>The following activities need the approval of the Ministry of Interior:</p> <p>Aircraft manufacturing 303001                      Manufacture of aircraft engines and engine parts 303002                      Manufacture of spare parts for aircraft and other auxiliary equipment 303003                      Manufacture of ground equipment for flight training 303004                      Manufacture of spacecraft, guided missiles, rocket propulsion units and spacecraft 303005                      Manufacture of aircraft and other space vehicles 303009                      Manufacture of military combat vehicles 304000</p>		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of other transportation equipment	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	30
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required                      An environmental site approval and an environmental permit are required (an initial or comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		
Additional information			

Manufacture of furniture

<b>Industrial sector</b>			
Service name/ purpose	Manufacture of home, office and kitchen furniture from wood, metal, plastic, bamboo and others		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Manufacture of furniture	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	31
Special conditions	<p>Please refer to Annex 1 for site selection requirements for development activities</p> <p>Land use classification: Industrial</p> <p>The approval of the Environmental Approvals Committee is required An environmental site approval and an environmental permit are required (an initial or comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p> <p>In cases where only painting operations are conducted: An approval and an environmental permit (a comprehensive environmental impact assessment study is required), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments</p>		
Additional information			

Other manufacturing industries

Industrial sector			
Service name/ purpose	<p>Manufacture of imitation jewelry and related items, making musical instruments and accessories, making sports tools and devices, making toys and dolls, manufacture of medical supplies and consumables, dental equipment and tools, making personal safety and protective products, making painter tools, pens and seals, making rain umbrellas and sun umbrellas, making educational aids, making smoking supplies, making wigs and eyelashes, making brushes, brooms and mops, making artificial flowers and plants, making coffins and caskets, making candles</p> <p>The following activities need the approval of the Ministry of Interior: Making jewelry from precious metals 321110</p> <p>The following activities need a noncriminal record certificate: Manufacture of silverware, tools and products of precious metals (except precious stones and jewelry) 321120 Making imitation jewelry ornaments and related items 321200 Manufacture of personal safety and protection products 329010</p>		
Pre-registration approvals	None		
Economic activity according to the National Directory of Classification of Economic Activities	Other manufacturing industries	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	32

Additional information	

Aquaculture-establishment and licensing of a fish and aquaculture farm and its products

<b>Agriculture and livestock sector</b>			
Service name / purpose	Establishment and licensing of a fish and aquaculture farm and its products		
The relevant entity	Ministry of Agriculture (authorized representative at the Comprehensive Investment Service)	The website: <a href="http://www.moa.gov.jo">www.moa.gov.jo</a>	
Economic activity according to the National Directory of Classification of Economic Activities	Aquaculture	Activity number according to the National Directory of Classification of Economic Activities, JORSIC	032
Conditions for obtaining the service	<p>It is prohibited to establish fish and aquaculture farms that annually produce over three varieties of fish before obtaining a license from the Ministry of Agriculture</p> <p>It is prohibited to establish hatcheries for the propagation of fish and aquatic life and trade in them before obtaining prior approval from the Ministry of Agriculture</p> <p>The licensing of fish and aquaculture farms requires the fulfillment of the following conditions:</p> <p>A suitable source of water for fish or aquaculture farms should be available in a quantity sufficient to cover the needs of the farm throughout the year, whereby daily flow rates are no less than 8 cubic meters per dunum (1,000m<sup>2</sup>) of the submerged area of earth and cement ponds. An exception to this requirement is the aquaponic system and closed culture systems, which ensure water circulation by at least 90% during one production cycle</p> <p>The use of drinking water from official water distribution networks is prohibited and the use of wastewater or treated water for fish and aquaculture is prohibited</p> <p>It is prohibited to establish any aquaculture farm unless its drainage lines are 100 meters from the nearest fish farming water inlet to a nearby farm. The water entry points to the farm must be far enough away from the exit points to prevent contamination of the water used for breeding and emphasis is placed on the establishment of a sedimentation pond for the water drained from the farm. The drainage of farm water should not affect other farms, and the water used on the farm should be drained after treatment</p> <p>The area of the land intended for the establishment of the farm must be no less than 3 Dunums (3,000m<sup>2</sup>). The land must have a classified regulated land used that is appropriate to the nature or purpose of the intended project. The establishment of farms within the boundaries of Greater Amman Municipality and municipal councils is prohibited, with the exclusion of the Jordan Valley areas. This prohibition does not include fish farming and aquaculture systems that operate according in a closed system, provided that 90% of the water is recycled and reused during one cycle and provided that residential/population settlement areas are not harmed</p> <p>There should be ponds suitable for breeding fish, provided that the height of pond walls is no less than one meter. The farm, pools or ponds should be surrounded by a fence at least two meters high to ensure public safety and prevent the entry of animals</p> <p>The farm should have a special feed store with sufficient space proportionate to the volume of production on the farm, and the necessary sanitary and technical conditions should be met to ensure the prevention of contamination, mold/fungus, damage and spoil of the feed. The feed storage facilities should be well ventilated and protected from insects, rodents and birds and isolated from the storage places of pesticides, chemicals, medicines and any other pollutants</p> <p>The farm should have a special warehouse for medicines, veterinary preparations and disinfectants, whereby veterinary drugs and chemicals are stored in a designated place according to the standards assigned to it and are recorded in a special register showing their types and shelf life</p> <p>There should be a pond/ pool dedicated to quarantine any fish entering the farm with the availability of conditions suitable for breeding</p> <p>The refrigerated pond/ pool or container should be used when harvesting the fish and marketing or selling of fish on the farm; the packaging, tools and containers used in the transportation and marketing of the fish should be made of a material resistant to corrosion and rust and easy to clean</p> <p>To see more conditions-please click on the order <a href="#">Here</a></p>		

Pre-approvals and prerequisites (if any)	Approval of the Ministry of Agriculture The approval of the Environmental Approvals Committee is required An environmental site approval and an environmental permit are required (a comprehensive environmental impact assessment study is needed), according to the Environmental Classification and Licensing Regulation No. 69 of 2020 and its amendments (for projects with a production capacity of 20t per year or more)

## The Health Sector

### Private hospital

A private hospital in terms of its medical potential and specialties is divided into the following:

#### A- General hospital

A general hospital offers patients basic medical specialties, namely gynecological surgery, obstetrics, treatment of internal diseases and pediatric diseases, at a minimum, in addition to the provisions set out in Article 7 of this Regulation, it requires the following: -

It should have a capacity of no less than 40 beds

It should have the equipment necessary to provide basic medical services in accordance with the Instructions issued by the Minister for this purpose

#### B- Specialized hospital

Specialized hospitals have the medical capability to treat patients in one of the specialties of medicine or dentistry and requires, in addition to the conditions set out in Article 7 of this Regulation, the following: -

It should have a capacity of no less than 20 beds.

It should have the equipment necessary to provide basic medical services in accordance with the instructions issued by the Minister for this purpose.

In general, for the two types of hospitals mentioned, there are a number of general requirements regarding the number of doctors:

The number of Jordanian doctors working in private hospitals must constitute no less than 90% of the total number of doctors working there.

The number of Jordanians working in a private hospital who are not doctors must constitute no less than 80% of the total number of its employees.

The number of Jordanian interns and doctors admitted to residency programs at a private hospital should constitute no less 75 % of the total number of interns and doctors admitted to residency programs at this private hospital.

This service is currently provided outside the scope of the Comprehensive Investment Service and the application is made directly and in person through the relevant entities.

The health sector

## Entrepreneurship and innovation projects

The Jordanian government has an interest in entrepreneurship that is in line with the challenges facing the Kingdom. The government recognizes that the development of entrepreneurship depends heavily on nurturing the talents of young people, harnessing their energies, building their capabilities and enabling them to engage in production and work. Therefore, a general entrepreneurship policy has been prepared and aims, in its broad outlines, to create a friendly and stimulating environment for entrepreneurship in the Kingdom.

The policy applies to entrepreneurs at various stages of their development, starting from the pre-establishment stage to the growth stage, with a focus on innovative startups and small companies, regardless of age, and on fast-growing companies based on innovation and supporting modern technologies, in all sectors and governorates in the Kingdom.

The Ministry of Digital Economy and Entrepreneurship is the relevant entity for entrepreneurship and innovation projects in the Kingdom. It will issue Instructions specialized in the definition of entrepreneurial and start-up companies and develop criteria for their classification.

## Step 6: obtaining vocation licenses

Issuing a vocation license - within the boundaries of Greater Amman Municipality

Issuing a vocation license	
Purpose	Issuing a vocation license allowing the site to be used for an economic activity
The relevant entity	Greater Amman Municipality
Beneficiary	The investor

## Registration and licensing services within development zones

### Introduction

Jordan has sought to establish a number of development zones aimed at establishing various economic activities that are suited to the competitive advantages enjoyed by each region. These zones, distributed throughout the Kingdom, are supervised by development companies whose task is to organize the investment process under the direct supervision of the Ministry of Investment. The objectives of these zones include:

The distribution of developmental advantages to all regions in the Kingdom.

To create job opportunities for specialized competencies.

The advantages of investing in development zones include:

The Ministry of Investment regulates the work of development zones and free zones throughout the Kingdom whereby they are dedicated to multiple areas of business and industries and equipped with what investors need in terms of infrastructure and services.

These zones are supervised by development companies that work to create the necessary infrastructure and facilitate the work of investors.

The development zones aim to distribute the advantages of economic development and create job opportunities by creating a competitive advantage based on specialization and providing an integrated system of services to investors that supports the growth and development of companies.

The free zones also contribute to enhancing the commercial status of Jordan by facilitating the transit of goods and stimulating economic movement.

The Ministry of Investment Comprehensive Investment Service provides simplified and fast registration and licensing services for companies operating in development zones.

The development zones provide beneficiaries with developed plots of land and modular buildings at competitive selling prices with the provision of all services, including the appropriate infrastructure, water and electricity services, in addition to a range of incentives and customs and tax exemptions, in accordance with the law.

There are 19 existing or under construction development zones in Jordan, as shown in the table below.

	Governorate	Name of the development zone	Master Developer	Nature of activity
1	Ma'raq	King Al-Hussein Ibn Talal Development Area/ Ma'raq	Ma'raq Development Company	Industrial Solar power Residential neighborhood
2	Ma'raq	Al Thuraya Industrial Development City	Thuraya Lands Development Company	Industrial
3	Irbid	Irbid Development Zone	North Development Company	Smart city (services+ scientific research+ information technology + medical industries)
4	Ma'an	Ma'an Development Zone	Maan Development Company	Industrial, residential neighborhood, solar energy fields, Hajj (pilgrimage) Oasis
5	Ma'an	Al-Muhammadiyah Development Zone	The Hashemite Fund for Development of Jordan Badia	Health squares for cattle
6	Balqa and Madaba	Dead Sea Development Zone	Jordan Free and Development Zones Group	Tourist
7	Ajloun	Ajloun Development Zone (Tourism Development walkway)	Jordan Free and Development Zones Group	Tourist
8	The capital, Amman	King Hussein Business Park Development Zone	Business Park Company	Offices, multi-use (information technology, media, educational and communication services)
9	The capital, Amman City	King Abdullah II Development Zone / Sahab	Jordan Industrial Cities company	Industrial
10	Irbid	Al-Hassan Development Zone	Jordan Industrial Cities company	Industrial
11	Karak	Al-Hussein Ibn Abdullah II Development Zone	Jordan Industrial Cities company	Industrial
12	The capital, Amman	Al-Muwaqqar Development Zone	Jordan Industrial Cities company	Industrial
13	Tafila	Al-Tafilah Development Zone	Jordan Industrial Cities company	Industrial
14	Madaba	Madaba Development Zone	Jordan Industrial Cities company	Industrial
15	Salt	Al-Salt Development Zone	Jordan Industrial Cities company	Industrial
16	Jerash	Jerash Development Zone	Jordan Industrial Cities company	Industrial
17	Zarqa	Zarqa Development Zone	Jordan Industrial Cities company	Industrial
18	The capital, Amman	The Specialized Investment Clusters Area	Specialized Investment Group Company	Industrial
19	Zarqa	Al-Dhulail Industrial Development Zone	Al-Dhulail Industrial Park & Real-estate Company	Industrial

## A summary of the key steps for practising economic activities in development zones

This part of the Manual covers the key steps necessary to initiate practicing an economic activity in the development zones. Figure 3 below shows these steps.

Figure 3 - steps necessary to initiate economic activities in development zones in Jordan

### **Step 1 - registration of the legal form of the economic activity**

This includes a list of steps followed by the investor for the purposes of establishing and registering the legal form of the economic activity.

### **Step 2 - registration as an establishment operating within the development zones by the Ministry of Investment**

This includes the investor's registration of the economic activity with the Ministry of Investment as an enterprise operating within the development zones

### **Step 3 - post-registration services**

This step includes the investor's access to post-registration services necessary for business practice, which may be licensing requirements for certain economic activities, these services are:

Register as a member with chambers of commerce or Industry

Registration with the Social Security Corporation

Registration with the Income and Sales Tax Department

Registration of a trade name

### **Step 4 – Selecting a site and obtaining environmental approvals**

Step four includes the investor obtaining the necessary environmental approvals, permits and licenses for a number of economic activities within the development zones

### **Step 5 - obtaining regulatory approvals and building permits**

This includes the investor obtaining the necessary permits for building and construction works of all kinds within the development zones.

### **Step 6 - obtaining sectoral licenses**

This step includes the conditions and procedures for obtaining a license to practice a specific economic activity, within the economic sectors or their branches that are covered by the Comprehensive Investment Service services.

### **Step 7 - obtaining licenses to operate a business**

This involves the investor obtaining a license to initiate operating in the development zone (this is equivalent to a vocation license) from the Ministry of Investment.

**One: step 1: registration of the legal form of economic activity (please refer to the tables in Step 1 – Registration) in Section One of this Manual.**

Annex 6 shows a list of restricted economic activities in the development zones, and the official entities relevant to these activities while Annex 7 shows a list of prohibited economic activities in development zones.

## Two: step 2: registration by the Ministry of Investment of an economic activity as an operating establishment within the development zones

Registration of economic activities within development zones	
Purpose	Registration of economic activities within development zones
The relevant entity	Ministry of Investment/ Department of Registration and Licensing for Development Zones
The beneficiary	All investors wishing to engage in economic activity within the development zones
Approvals and prerequisites	Certificate of registration (trade register) (sole proprietorship or companies)
Registration conditions	The establishment must be located within the development zones The economic activity should not be one that is listed as prohibited or restricted in the Investment Environment Regulation No. 7 of 2023. (Annex 6)
Required documents	Trade register A copy of the signed contract with the owner having the right to dispose of the property if it is not owned by the applicant The land title register A land parcel site regulatory plan Land parcel plan An investment agreement whereby an economic activity is established within the borders of a development zone
The forms used	The application is submitted electronically through the Ministry of Investment website
Procedures/ action steps	The applicant enters all the required data accompanied by the required documents, the system checks the data electronically and the service recipient is notified of the completion of the data and the fulfillment of the initial requirements Upon approval of the application, an electronic notification of approval is sent to the applicant Payment for services and fees is made by entering the electronic payment information on the eFAWATEERcom system and receiving the electronic receipt Verification or creation of a tax number for economic activity is can be completed through the system A registration certificate for an enterprise in development and free zones is issued and sent to the service recipient by mail/ or handed to the recipient directly
Fees	JOD 1,800
Required duration	1 – 5 days
The final output	A registration certificate for an enterprise in the development and free zones
Relevant legislation	Investment Environment Law No. 21 of 2022. Investment Environment Regulation No. 7 of 2023.
Additional information	The investor has the option of registering a trade name in accordance with the Trade Names Law No. 9 of 2006 and the Regulation issued pursuant thereto.  The investor can find the documents and policies required to register his/ her enterprise within the development zones through the Policies and Procedures Guide for the Investor Services Directorate available on the Ministry of Investment website

### Three: step number 3: post-registration services, including:

- Registering as a member with the chambers of commerce or industry
- Registration with the Social Security Corporation
- Registration with the Income and Sales Tax Department
- Registration of a trade name

To view the profiles for these services please see Step 2 of Section One of this Manual

### Four: step 4: site selection and obtaining environmental approvals by the Ministry of Investment

The Ministry of Investment, through a special committee, grants environmental approvals within the development zones for low-risk economic activities, while environmental approvals and licenses for medium and high-risk activities are granted directly by the Ministry of Environment.

Level of severity	Required approval	Requirements
Low-risk – listed in Annex 2	None	Compliance with environmental requirements
Limited risk-listed in Annex 3	Environmental site approval	Compliance with environmental requirements

As for medium and high-risk economic activities that need an initial or comprehensive environmental impact assessment study; these are obtained directly from the Ministry of Environment (please see the profiles in Step 3)

## Issuing environmental site approvals for activities within development zones

An approval is obtained from the Ministry of Investment for activities within the development zones that are classified as "low risk", as specified in Annex 2 of this Manual; obtaining site approvals for these activities does not require an environmental impact assessment

Issuing environmental site approvals within the development zones	
Service name/ purpose	To obtain environmental approvals for development projects and infrastructure projects for limited-risk projects (an environmental impact assessment study is not required)
The relevant entity	The Ministry of Investment, through a special Environmental Approvals Committee
Beneficiary	All investors wishing to engage in economic activities within the development zones
Special conditions	The activity should be within the development zones
Pre- approvals and prerequisites (if any)	None
Required documents	A cover letter from the Master Developer Registration certificate (trade register?) Land parcel plan The croquis plan is only required for lands of an area greater than 10 Dunums (10,000m <sup>2</sup> ) Land title register Land parcel site regulatory plan Land parcel cadastral coordinates
The forms used	A request letter from the person concerned or authorized representative The electronic environmental technical form
Procedures / action steps	The application is submitted accompanied by all the required documents and project details Payment of fees A phone call is received to schedule a site visit The person concerned attends the site visit conducted by the Directorate of Licenses and Pollution Reduction from the Ministry of Environment The application is presented, accompanied by the site visit report to the Environmental Approvals Committee Notification of the Committee decision is received If the Committee approves, a text message is received informing the applicant that the letter is ready
Fees	JOD 50 +16% outside the development zones if provided through the Comprehensive Investment Service JOD 50 +16% + JOD 25 payable to the Ministry of Environment within the development zones if provided through the Comprehensive Investment Service
Required duration	7 days
The final output	A letter from the Ministry of Investment with the environmental approval
Relevant legislation	Investment Environment Law No. 21 of 2022. Regulating the Investment Environment Regulation No. 7 of 2023. Environmental Protection Law No. 6 of 2017 Environmental Impact Assessment Regulation No. 37 of 2005 Instructions for Site Selection of Development Activities of 2018 Environmental Classification and Licensing Regulation No. 69 of 2020
Additional information	

## Five: step 5: obtaining planning regulatory approvals and building permits within development zones

### Building permits

A building permit for an existing building within the development zones

A building permit for an existing building within the development zones	
Purpose	Issuing a building permit for an existing building in development zones
The relevant entity	Ministry of Investment
Beneficiary	The investor
Special conditions	The property must be located within development zones or free zones
Pre-approvals and prerequisites	Environmental approval (if required) Sectoral approvals according to the activity (if required)
Required documents	A cover letter from the Master Developer/ or a request letter (private properties for the Dead Sea region) Land title register Land parcel plan Land parcel site regulatory plan Cadastral report Duly authenticated engineering drawings/ blueprints, at least 3 copies Previous building permits, if any Previous occupancy permits, if any Environmental approval (if required) Agreements (sale or lease) Clearance letter Safety of the facility (if necessary)
The forms used	The application is submitted electronically through the Ministry of Investment website <a href="https://www.moin.gov.jo/ar/home/">https://www.moin.gov.jo/ar/home/</a>
Procedures/ action steps	The application is electronically submitted accompanied by all the required documents through the Ministry of Investment website by the service recipient or the Master Developer The application is reviewed by the relevant department and the applicant is notified if there is incorrect or incomplete information If necessary, a site visit date is scheduled and the service recipient is informed After the required documents are completed, a technical study is prepared and submitted to the local committee for a technical or regulatory decision The person concerned is informed of the decision of the local committee through a notification letter The construction deposit amount or the building area violations fee, if any, is calculated and the recipient is notified The required amount is paid electronically by the person concerned through the eFAWATEERcom service The building permit is printed and signed by the head of the relevant department and submitted to the Director of the Licensing and Control Directorate for signature After the building permit is printed and signed, the engineering drawings/ blueprints are authenticated The applicant is contacted to receive the document and stamped engineering drawings
Fees	Exempt from licensing fees Construction deposits or building area violation fees are collected (According to the Investment Environment Regulation No. 7 of 2023) Service fees are collected according to the regulatory instructions
Required duration	12 days if the documents are complete and correct (and a maximum of 15 working days according to the Regulating the Investment Environment Regulation No. 7 of 2023)
The final output	Issuance of a building permit and authenticated drawings/ blueprints
Relevant legislation	Investment Environment Law No. 21 of 2022. Regulating the Investment Environment Regulation No. 7 of 2023.
Additional information	

## A building permit for a proposed building within the development zones

A building permit for a proposed building within the development zones	
Purpose	Issuing a building permit for a new building (proposed) in free or development zones
The relevant entity	Ministry of Investment
The beneficiary	The investor
Special conditions	The property must be located within development zones or free zones
Approvals and prerequisites	Environmental approval (if required) Sectoral approvals according to the activity (if required)
Required documents	A cover letter from the Master Developer/ or a service request letter (private properties for the Dead Sea region) Land title register (record of registration of immovable funds) Land parcel plan Land parcel site regulatory plan Supervision contract (for areas greater than 250m <sup>2</sup> ) Contractor agreement Duly authenticated engineering drawings/ blueprints, at least 3 copies Environmental approval (if required) Agreements (sale or lease) A clearance letter
The forms used	The application is submitted electronically through the Ministry of Investment website <a href="https://www.moin.gov.jo/ar/home/">https://www.moin.gov.jo/ar/home/</a>
Procedures/ action steps	The application is electronically submitted accompanied by all the required documents through the Ministry of Investment website by the service recipient or the Master Developer The application is reviewed by the relevant department and the applicant is notified if there is incorrect or incomplete information After the required documents are complete, a technical study is prepared and submitted to the local committee for a technical or regulatory decision The person concerned is informed of the decision of the local committee through a notification letter The construction deposit amount or the building area violations fee, if any, is calculated and the recipient is notified The required amount is paid electronically by the person concerned through the eFAWATEERcom service The building permit is printed and signed by the head of the relevant department and submitted to the Director of the Licensing and Control Directorate for signature After the building permit is printed and signed, the engineering drawings/ blueprints are authenticated The applicant is contacted to receive the document and stamped engineering drawings
Fees	Exempt from license fees Construction deposits or building area violation fees are collected (According to the Investment Environment Regulation No. 7 of 2023) Service fees are collected according to the regulatory instructions
Required duration	12 days if the documents are completed (and a maximum of 15 working days according to the Investment Environment Regulation No. 7 of 2023)
The final output	Issuance of a building permit and authenticated drawings/ blueprints
Relevant legislation	Investment Environment Law No. 21 of 2022. Regulating the Investment Environment Regulation No. 7 of 2023.
Additional information	

## Issuing a building permit to expand or add built areas within the development zones

A building permit to expand or add built areas within the development zones	
Purpose	The service of issuing a building permit for additional built areas or expansion (proposed, existing or proposed and existing) in the development zones
The relevant entity	Ministry of Investment
Beneficiary	The investor
Special conditions	The property must be located within development zones or free zones.
Approvals and prerequisites	Environmental approval (if required) Sectoral approvals according to the activity (if required)
Required documents	A cover letter from the Master Developer/ or a request letter (private properties for the Dead Sea region) Land title register (record of registration of immovable funds) Land parcel plan Land parcel site regulatory plan Supervision contract (for areas greater than 250m2) Contractor agreement for new (proposed) building Cadastral report (if there is an addition to the building or if it is an existing building) Duly authenticated engineering drawings/ blueprints, at least 3 copies Previous building permits, if applicable Environmental approval (if required) Agreements (sale or lease) A clearance letter
The forms used	The application is submitted electronically through the Ministry of Investment website of the <a href="https://www.moin.gov.jo/ar/home/">https://www.moin.gov.jo/ar/home/</a>
Procedures/ action steps	The application is electronically submitted accompanied by all the required documents through the Ministry of Investment website by the service recipient or the Master Developer The application is reviewed by the relevant department and the applicant is notified if there is incorrect or incomplete information If necessary, a site visit date is scheduled and the service recipient is informed After the required documents are complete, a technical study is prepared and submitted to the local committee for a technical or regulatory decision The person concerned is informed of the decision of the local committee through a notification letter The construction deposit amount or the building area violations fee, if any, is calculated and the recipient is notified The required amount is paid electronically by the person concerned through the eFAWATEERcom service The building permit is printed and signed by the head of the relevant department and submitted to the Director of the Licensing and Control Directorate for signature After the building permit is printed and signed, the engineering drawings/ blueprints are authenticated The applicant is contacted to receive the document and stamped engineering drawings
Fees	Exempt from license fees Construction deposits or building area violation fees are collected (According to the Regulation Investment Environment Regulation No. 7 of 2023) Service fees are collected according to the regulatory instructions
Required duration	12 days if the documents are complete (and a maximum of 15 working days according to Regulating the Investment Environment Regulation No. 7 of 2023)
The final output	Issuance of a building permit and authenticated drawings/ blueprints
Relevant legislation	Investment Environment Law No. 21 of 2022. Regulating the Investment Environment Regulation No. 7 of 2023.
Additional information	

Issuing a license for renewable energy projects/ solar cells within the development zones

License of renewable energy projects within development zones	
Purpose	Renewable energy projects license issuance service/ solar cells in development zones
The relevant entity	Ministry of Investment
Beneficiary	The investor
Special conditions	The property must be located within development zones or free zones The building that will have solar cells installed on its roof must have a building permit
Pre-approvals and prerequisites	Previous building permits Approval from the electricity company/ electricity distribution company Environmental approval The approval of the Energy & Minerals Regulatory Commission, EMRC, if the capacity exceeds 1 MW Occupancy permit (if necessary)
Required documents	A cover letter from the Master Developer/ or a request letter (private properties for the Dead Sea region) Electricity company approval / electricity distribution Approval of the Ministry of Environment if necessary Approval of the Energy & Minerals Regulatory Commission if the capacity exceeds 1MW Land parcel plan Land title register Land parcel site regulatory plan Contractor agreement (excluding cells on rooftops) Supervision contract, if necessary The agreement and annexes A building permit Duly authenticated drawings (engineering drawings for installing solar panels on the roof, number, size of the system, distribution, vertical height)
The forms used	The application is submitted electronically through the Ministry of Investment website <a href="https://www.moin.gov.jo/ar/home/">https://www.moin.gov.jo/ar/home/</a>
Procedures/ action steps	The application is electronically submitted accompanied by all the required documents through the Ministry of Investment website by the service recipient or the Master Developer The application is reviewed by the relevant department and the applicant is notified if there is incorrect or incomplete information If necessary, a site visit date is scheduled and the service recipient is informed After the required documents are complete, a technical study is prepared and submitted to the local committee for a technical or regulatory decision The person concerned is informed of the decision of the local committee through a notification letter The construction deposit amount or the building area violations fee, if any, is calculated and the recipient is notified The required amount is paid electronically by the person concerned through the eFAWATEERcom service The building permit is printed and signed by the head of the relevant department and submitted to the Director of the Licensing and Control Directorate for signature After the building permit is printed and signed, the engineering drawings/ blueprints are authenticated The applicant is contacted to receive the document and stamped engineering drawings

Fees	Exempt from license fees Construction deposits or building area violation fees are collected (According to the Regulation Investment Environment Regulation No. 7 of 2023) Service fees are collected according to the regulatory Instructions
Required duration	10 days if the documents are complete (and a maximum of 15 working days according to the Regulating the Investment Environment Regulation No. 7 of 2023)
The final output	Issuing a license for renewable energy projects
Relevant legislation	Investment Environment Law No. 21 of 2022. Regulating the Investment Environment Regulation No. 7 of 2023
Additional information	

## Occupancy permit

### Issuing an occupancy permit

Issuing an occupancy permit	
Purpose	Issuing an occupancy permits within development zones
The relevant entity	Ministry of Investment
Beneficiary	The investor
Special conditions	The property must be located within development zones or free zones. The construction should be existing, complete and all works finished according to the drawings The building must have a building permit
Pre-approvals and prerequisites	Previous building permits Civil Defense Directorate approval
Required documents	A cover letter from the Master Developer/ or a request letter (private properties for the Dead Sea region) Land parcel plan Land title register Land parcel site regulatory plan Agreements (sale, lease) Approval of the Civil Defense to grant an occupancy permit Cadastral report As built engineering drawings (if there are unlicensed building area violations or amendments to the permit) Certificate of conformity from the Jordan Engineers Association or the facility safety certificate Previous occupancy permits (if any) Previous building permits (if any)
The forms used	The application is submitted electronically through the website of the Ministry of Investment <a href="https://www.moin.gov.jo/ar/home/">https://www.moin.gov.jo/ar/home/</a>
Procedures/ action steps	The application is electronically submitted accompanied by all the required documents through the Ministry of Investment website by the service recipient or the Master Developer The application is reviewed by the relevant department and the applicant is notified if there is incorrect or incomplete information If necessary, a site visit date is scheduled and the service recipient is informed After the required documents are complete, a technical study is prepared and submitted to the local committee for a technical or regulatory decision The person concerned is informed of the decision of the local committee through a notification letter The occupancy permit is printed and signed by the head of the relevant department and submitted to the Director of the Licensing and Control Directorate for signature The applicant is contacted to receive the document
Fees	Exempt from license fees Service fees are collected according to the regulatory instructions
Required duration	10 days if the documents are complete (and a maximum of 15 working days according to the Regulating the Regulation Investment Environment Regulation No. 7 of 2023)
The final output	Issuance of an occupancy permit document
Relevant legislation	Investment Environment Law No. 21 of 2022. Regulating the Investment Environment Regulation No. 7 of 2023.
Additional information	

**Six: step 6: obtaining licenses (please see the profiles provided in Step 5 of Section One of this Manual.****Seven: step 7: obtaining licenses to practice business**

Obtaining a license to practice an economic activity within the development zones and free zones (equivalent to a vocation license)

Issuing a license to practice an economic activity	
Purpose	Obtaining a license to practice an economic activity within the development zones and free zones
The relevant entity	Ministry of investment
Beneficiary	The investor
Special conditions	The economic activity should match the economic activities specified for the region in accordance with the development zone declaration resolution The economic activity should not be prohibited or restricted The economic activity must meet regulatory requirements, public safety requirements, and general health and environmental requirements
Required documents	Registration certificate ( trade register?) of the company or a trade register for a sole proprietorship Trade name certificate, if any, whether the applicant is a company or a sole proprietorship business A copy of the signed contract with the owner having the right to dispose of the property if it is not owned by the applicant An authenticated copy of the registration certificate of the association or organization with the relevant entity if the applicant is an association or an organization; or the legal legislation pursuant to which the institution was established if the applicant is an official entity. The land title register Land parcel regulatory site plan Land parcel plan  The following additional documents are requested from establishments that started their business before Instructions were issued and had not obtained the license; To reconcile their situation in accordance with the transitional phase, the following additional documents are required: The most recent vocation license Occupancy permit
The forms used	The application is submitted electronically through the Ministry website
Procedures/ action steps	The applicant enters all the required data accompanied by the required documents, and the applicant is notified of the completion of the data and the fulfillment of the initial conditions Upon approval of the application, the fees are determined by the Investor Services officer and a payment order is issued Payment for services and fees is made by entering the electronic payment information on the eFAWATEERcom service and receiving an electronic receipt A license to practice an economic activity is issued and handed to the applicant
Fees	JOD 50 to 5,000 -depending on the area and the activity JOD 150 issuance of a license fee
Required duration	5 days
The final output	Issuance of a license to practice an economic activity within the development zones and free zones
Relevant legislation	Investment Environment Law No. 21 of 2022. Regulating the Investment Environment Regulation No. 7 of 2022
Additional information	The investor can find the required documents and policies necessary to obtain a license to practice an economic activity within the development zones in the Policies and Procedures Guide of the Investor Services Directorate on the Ministry of Investment website

## Registration and licensing services within free zones

### Free zones

The government of the Hashemite Kingdom of Jordan considers free zones to be a stimulating tool for achieving economic growth and industrial development. Therefore, the idea of establishing free zones was first introduced in 1966, when the then Jordanian government commissioned the United Nations Industrial Development Organization (UNIDO) to conduct an economic feasibility study to establish a free zone in Jordan, and the results of the study recommended the feasibility of this project and the Jordanian experiment in the field of free zones began in 1973.

At that time, a small free zone with an area of 19 Dunums (19,000m<sup>2</sup>) was established in the port of Aqaba to develop international trade exchanges and serve the transit trade. Due to the increased demand for its services in that period, the government increased the area allocated to the free zone in Aqaba to 2,000 Dunums (2,000,000m<sup>2</sup>). In light of the success of this experience, the Jordan free zones Foundation was established as a financially and administratively independent institution in 1976 under an interim Law No. 39 of 1976, and its tasks at that time included the establishment of free zones and the management of investment in them.

### Objectives of the free zones:

Attracting local and foreign capital to be utilized within the country in various investment activities.  
Introducing technology and technical skills to the Kingdom.  
Employing local savings and investing them in industrial, trade and various economic activities established in free zones.  
Revitalization of the transport sector and other services.  
Provide job opportunities for the workforce and increase their skills.  
Developing new regions in the Kingdom through establishing investment projects in them.  
Encouraging the establishment of export industries and stimulating the transit trade.  
Enhancing the leading role of the private sector in the establishment of private and joint free zones that use local raw materials as production inputs.  
Supplying the national economy with hard currencies to support the balance of payments.  
Strengthening the front and back linkages of the commodity and service production sectors in the free zones with what complements them in varied economic activity production throughout the Kingdom, towards the development of the national economy.

Free zones are distributed throughout the Kingdom as follows:

	<b>Governorate</b>	<b>Name of the region</b>	<b>Nature of activity</b>
1	Zarqa	Zarqa Free Zone	Industrial, commercial, services, tourist
2	Maftaq	Karama Free Zone	Industrial, commercial, services, tourist
3	Karak	Karak Free Zone / Al Hussein Ibn Abdullah II Industrial City	Industrial, commercial, services, tourist
4	Muwaqqar	Muwaqqar Free Zone	Industrial, commercial, services, tourist
5	The capital, Amman	Sahab Free Zone/ King Abdullah II Industrial City/ Capital Governorate	Industrial, commercial, services, tourist
6	The capital, Amman	Queen Alia International Airport Free Zone	Industrial, commercial, services, tourist

## A summary of the procedures for conducting economic activities in free zones

This part of the Manual covers the key steps necessary to initiate practicing an economic activity in free zones, Figure 4 below shows these steps

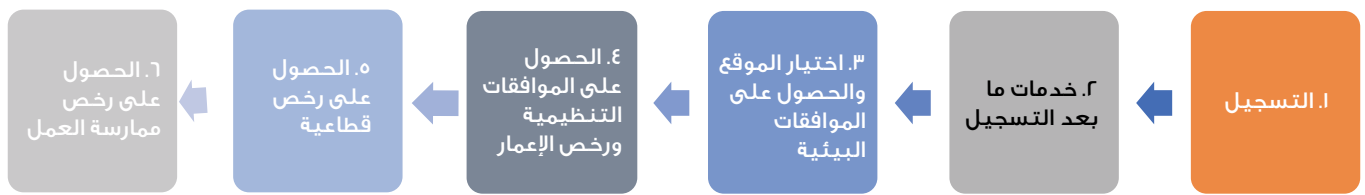

Figure 4 - steps necessary to initiate practicing economic activities in free zones in Jordan

### Step 1: registration

This step includes a list of the steps followed by the investor for the purposes of establishing and registering the legal form of economic activity with the Jordan Free and Development Zones Group.

The right to incorporate and register in free zones is limited to:

1. Sole proprietorship
2. A partnership company
3. A limited partnership company
4. Limited liability company
5. A foreign company
6. An operating company branch

### Step 2: post-registration services

This includes the investor's access to post-registration services necessary for business practice, which may constitute licensing requirements for certain economic activities; these services are:

- Registration with the Social Security Corporation
- Registration with the Income and Sales Tax Department
- Registration of a trade name
- Establishments operating in the free zones do not require memberships with the chambers of commerce and industry.

### Step 3: selecting a site and obtaining environmental approvals

This includes the investor obtaining the necessary environmental approvals, permits and licenses for a number of economic activities within the free zones by submitting a service request to the Jordan Free and Development Zones Group, and the Ministry of Environment issues the permits.

### Step 4: obtaining regulatory approvals and building permits

This includes the investor obtaining the necessary permits for building and construction works of all kinds within the free zones.

### Step 5: obtaining sectoral licenses

This includes the conditions and procedures for obtaining a license to practice a specific economic activity, within the economic sectors or their branches covered by the Comprehensive Investment Services.

### Step 6: obtaining licenses to practice business

This involves the investor obtaining a license to initiate operating in the free zone (equivalent to a vocation license) from the Ministry of Investment.

## Step 1: registration of the legal form of economic activity within the free zones

### First-time registration of a company within the free zones

Fees	<p>(0.003) from the value of the declared company capital as a registration fee (the minimum amount for registration of a company is JOD 25)</p> <p>(0.003) stamp duty fee from the value of the registered capital</p> <p>(JOD 500) fees for registering a foreign name for the company if the name is foreign</p> <p>(JOD 15) registration announcement in the Official Gazette fee</p> <p>(JOD 10) fee for the registration application form (including the articles of incorporation and the articles of association) (10 JD) bank deposit fee</p> <p>(JOD 100) for issuing a license to practice an investment activity</p> <p>(JOD 0.2) stamp duty for issuing a license to practice an investment activity</p> <p>(JOD 10) fees for filing the attendee list and minutes of the incorporation meeting of the corporate body</p> <p>(JOD 0.7) fees for filing the attendee list and minutes of the incorporation meeting of the corporate body</p> <p>(JOD 10) fees for filing the minutes of the meeting of the body of directors if the company is managed by a body of directors</p> <p>(0.7 JD) stamp duty for filing the minutes of the body of directors meeting</p> <p>(JOD 10) fees for the election of authorized representatives</p> <p>(JOD 0.2) stamp duty for the election of authorized representatives</p> <p>(JOD 10) fees for the election of a chairman, deputy or general manager</p> <p>(JOD 0.2) stamp duty for the election of a president, deputy, or general manager</p> <p>(JOD 10) for issuing an original registration certificate</p> <p>(JOD 0.5) stamp duty for issuing a registration certificate</p> <p>(JOD 10) for issuing a certificate of 'To Whom it May Concern'</p> <p>(JOD 0.5) stamp duty for issuing a certificate of 'To Whom it May Concern'</p> <p>(JOD 10) for authenticating or extracting an exact copy of any document from the company file</p> <p>(JOD 10) for issuing a letter addressed to the Ministry of Interior regarding the facilitation towards granting or renewing a residence permit</p> <p>(JOD 10) for issuing a letter addressed to the Ministry of Interior requesting a security approval</p> <p>(JOD 2,000) deposits guarantee</p>
Required duration	51 mins
The final output	<p>Certificate of registration of a company with limited liability (leased / special free zone)</p> <p>A certificate of 'To Whom it May Concern' (authorized representatives)</p> <p>License to practice an investment activity</p>

Relevant legislation	<p>Investment Environment Law No. 21 of 2022.  Regulating the Investment Environment Regulation No. 7 of 2022  Investment Environment and Registration of Enterprises in Development and Free Zones Regulation of 2015  The Registration and Licensing of Establishments in Free Zones Regulation No. 58 of 2003.  Jordan Companies Law No. 22 of 1997 and its amendments  The Real Beneficiary Register Regulation No. 62 of 2022 issued pursuant to Paragraph (D) of Article (273/ repeated) of the Companies Law No. 22 of 1997  The Stamp duty Law  Companies Law No. 77 of 2008  Investment in Free Zones in Civil Airports Regulation 1999  Principles for Operational Non-Leasing Companies</p>
Additional information	

## **Step 2: post-registration services**

These services are provided outside the scope of the Comprehensive Investment Service and must be provided directly through the relevant entities – electronically or in person.

Registration with the Social Security Corporation ([Click here](#))

Registration with the Income and Sales Tax Department ([Click here](#))

Registration of a trade name ([Click here](#))

**Please see Step 2 of Section One of this Manual**

## **Step 3: site selection and obtaining environmental approvals (please see the tables in Step 3)**

This includes the investor obtaining the necessary environmental approvals, permits and licenses for a number of economic activities within the free zones by submitting a service request through the Jordan Free and Development Zones Group and issuing permits through the Ministry of Environment.

Issuing an environmental site approval ([Click here](#))

Issuing environmental licenses ([Click here](#))

#### Four: step 4: obtaining planning regulatory approvals and building permits

Issuance of building permits	
Purpose	Issuing a building permit in free zones
The relevant entity	Jordan Free and Development Zones Group
The beneficiary	The investor
Required documents	Engineering drawings/ blueprints* A financial guarantee of JOD 500 Land parcel site regulatory plan
The forms used	Unified Service Form
Procedures/ action steps	<p>The service recipient submits an application for the approval of engineering drawings/ blueprint</p> <p>If the area does not exceed 60 m<sup>2</sup>, an illustrative drawing of the building is presented</p> <p>If the area is greater than 60 m<sup>2</sup>, the drawings/ blueprints must be authenticated by the Jordan Engineers Association</p> <p>If the drawings are of warehouses and hangars, they must be authenticated by the Civil Defense Directorate in addition to the authentication of the Jordan Engineers Association if the area is greater than 100 m<sup>2</sup>, however, for an area less than this, engineering drawings authenticated by an authorized engineering office are sufficient</p> <p>The service recipient pays a minimum financial guarantee of JOD 500 to ensure compliance with the required instructions and conditions</p> <p>The service recipient receives a commencement/ initiation of building letter directly from the Infrastructure Services Directorate</p> <p>The service recipient receives a report from the Civil Defense Directorate stating his/ her commitment to the requirements of Civil Defense and public safety and making sure that there are no violations of setbacks, and if there are, the fine is paid according to the regulations and instructions in force within the free zones</p> <p>The service recipient receives the building permit signed and duly authenticated</p> <p>In the absence of building area violations, the service recipient receives a refund of the amount deposited as insurance</p>
Fees	JOD 10 for a land parcel site regulatory plan
Required duration	2 days
The final output	Issuance of a building permit
Relevant legislation	<p>Investment Environment Law No. 21 of 2022.</p> <p>Regulating the Investment Environment Regulation No. 7 of 2022</p> <p>Draft amendment Instructions for the technical conditions for the license to establish buildings and facilities within the free zones issued by the Board of Directors Resolution No. 734/10/2019 dated 10/07/2019</p>
Additional information	<p>In reference to the engineering drawings/ blueprints:</p> <p>If the area does not exceed 60 m<sup>2</sup>, an illustrative drawing of the building is presented, however, if the area is greater than 60 m<sup>2</sup>, the drawing must be authenticated by the Jordan Engineers Association</p> <p>If the drawings are of warehouses and hangars, they must be authenticated by the Civil Defense Directorate in addition to the authentication of the Jordan Engineers Association if the area is greater than 100 m<sup>2</sup>, however, for an area less than this, engineering drawings authenticated by an authorized engineering office are sufficient</p> <p>The building and construction drawings must comply with the applicable technical provisions and instructions required for licenses within the free zone, that have been in force since 2019</p>

**Step 5: obtaining sectoral licenses (please see the profiles provided in Step 5 of Section One of this Manual.**

**Step 6: obtaining licenses to practice business**

Obtaining a license to practice an economic activity within the free zones (equivalent to a vocation license)

Issuing a license to practice an economic activity	
Purpose	Obtaining a license to practice an economic activity within the free zones
The relevant entity	Jordan Free and Development Zones Group
The beneficiary	The investor
Special conditions	The economic activity should match the economic activities specified for the region in accordance with the development zone declaration resolution The economic activity must meet regulatory requirements, public safety requirements, and general health and environmental requirements The economic activity should not be listed as a prohibited or restricted economic activities in the Investment Environment Regulation No. 7 of 2023. (Annex 6)
Pre-approvals	Approval of the investment committee (application to rent the investment unit in sealed envelope form/ application for conveyance of the right to benefit from the leased property/ application for investment and benefit from the leased property) Approval of the Ministry of Interior if the investor is a non-Jordanian (security approval) for all nationalities
Required documents	Personal identification documents for the persons concerned (Civil Status ID card for Jordanians) or travel document/ passport for non-Jordanians, provided that they are valid for at least six months A noncriminal record certificate for Jordanians Feasibility study for industrial projects A request for a conveyance of the right to benefit from the leased property for the remaining period of the lease agreement or a request to invest and lease the benefit for the property (sealed envelope/ directly) Approval of the Ministry of Interior A noncriminal record certificate for Jordanians Customs audit Land parcel site regulatory plan Land parcel plan
The forms used	
Procedures/ action steps	The service recipient, upon obtaining the approval of the investment committee (on the request to lease and invest an investment unit or a conveyance of the right to benefit from the leased property), consults the Directorate of Investor Services The service recipient pays the service fees electronically through the eFAWATEERcom service The service recipient receives a copy of the license to practice an investment activity
Fees	(JOD 100) for the license to practice an investment activity for a company (JOD 0.2) company license stamp duty (issuing license to practice an investment activity) (JOD 50) the license to practice investment activity per individual (JOD 0.2) license stamp duty - individuals (issuing an investment activity license)
Required duration	3 working days
The final output	Issuing a license to practice economic activity within the free zones

Relevant legislation	<p>Investment Environment Law No. 21 of 2022.  Investment Environment Regulation No. 7 of 2022  Amended Regulation of the Investment Environment and Registration of Enterprises in Free and Development Zones  Investment Environment and Registration of Enterprises in Development and Free Zones Regulation of 2015  The Registration and Licensing of Establishments in Free Zones Regulation No. 58 of 2003.  Free Zone Services Fees in Free Zones Regulations 2008  Investment in Free Zones Regulation 1987 and its amendments</p>
Additional information	

## Obtaining a single approval

Granting a single approval is one of the advantages added through the new Investment Environment Law, as this approval is granted by the Cabinet of Ministers upon the recommendation of the Incentives and Exemptions Committee, if it constitutes a strategic economic activity that contributes to achieving sustainable development. This consent is a substitute to any license, permit or authorization required by any legislation.

A single approval application must meet the following conditions:

1. The economic activity must be a strategic economic activity in accordance with the provisions of Paragraph (A) of Article 28 of the Regulating the Investment Environment Regulation.
2. The economic activity should be exercised by one of the types of companies listed in the Companies Law, excluding a limited liability company, for the duration of the project.
3. The investor must not have been convicted of an economic crime violating the provisions of the Economic Crimes Law, of fraud, or of money laundering, by virtue of a final judgement, whether in the Kingdom or another country.

## Single approval card

Obtaining a single approval	
Purpose	Single approval service
The relevant entity	Ministry of Investment
The beneficiary	The investor
Special conditions	The investor/ economic activity must be subject to the Investment Environment Law No. 21 of 2022 and articles 28 and 36 of the Regulating the Investment Environment Regulation
Required documents	A company or establishment register A brief description of the economic activity The expected investment amount A noncriminal record certificate for the partners Account statement showing financial solvency proving the investor's ability to implement the project A regulatory site plan for the plot of land the project is intended to be built upon Engineering drawings/ blueprints of the project by a licensed engineering office An economic feasibility study of the project to include an economic impact study and the project schedule Validation that the project meets the strategic standards according to the provisions of Article 28/ A of the Regulation A summary showing the impact of the project on the local community A bank guarantee/ surety of 2% of the expected investment amount issued by a bank operating in the Kingdom A commitment statement that all the requirements and conditions necessary for the implementation of the project will be complied with
The forms used	The application is submitted electronically through the Ministry website

Procedures/ action steps	<p>The applicant enters all the required data accompanied by the required documents, and the service recipient is notified of the completion of the data and the fulfillment of the initial conditions</p> <p>Upon approval of the application, the fees are automatically determined by the Incentives Committee on the platform and the service recipient is notified electronically by e-mail.</p> <p>Payment for services and fees is made by entering the electronic payment information on the eFAWATEERcom service and receiving the electronic receipt</p> <p>The recommendation for approval is submitted by the head of department and the manager to the Minister of Investment. It is then submitted to the Incentives and Exemptions Committee headed by the Prime Ministey for a decision of approval or rejection</p> <p>The decision of approval or rejection is sent to the service recipient through the electronic platform.</p>
Fees	Fees are determined by the Incentives and Exemptions Committee
Required duration	15 days
The final output	Decision to obtain a single consent
Relevant legislation	<p>Investment Environment Law No. 21 of 2022</p> <p>Regulating the Investment Environment Regulation No. 7 of 2023</p>
Additional information	For information on the documents necessary to obtain a single approval, the investor can access the electronic platform of the Ministry of Investment on the Ministry website.

## Annex 1

A list of stipulated requirements for the site selection for a number of economic activities and are a requirement for obtaining environmental approvals thereafter.

The project		Remoteness from the population, planned regulated zones and sensitive facilities	Distance from contaminating facilities	Distance from a Main Street
Conditions for the location of food factories	Food factories that do not produce odors such as: (Biscuit, candy, sweets, pastries, molasses, meat, pasta, water, juice, canning of vegetables and fruits, pickles, mills, dairy factories)	200m	200 m and 500m from landfills and wastewater treatment plants	
	Food factories within industrial or commercial areas		30m and 50m from chemical facilities and 250m from landfills and wastewater treatment plants	
	Food factories that produce odors such as: vegetable and animal oil factories, halva and tahini	1km	50m and 1km from landfills and wastewater purification plants	100m
	Yeast and spirits factories	2km	500m and 1km from landfills and wastewater treatment plants	100m
	Dairy plants (manual)		200m and 500m from cattle and sheep farms 500m from landfills and wastewater treatment plants	
	Water filtering stations and cup filling lines		200m and 50m for cattle, sheep and poultry farms and 500m from landfills and wastewater treatment plants	

Conditions for factories and plants producing paper and cardboard plates			200m and 500m from landfills and wastewater treatment plants	
Conditions for cosmetics plants factories and			200m and 500m from landfills and wastewater treatment plants	
Conditions for Slaughterhouse sites		2km		300m
Conditions for the locations of animal protein factories		5km		2km
Conditions for the location of sponge factories		500m		100m
Conditions for the sites of Potash industry, glass sand, Gypsum, manufacture, extraction and smelting of minerals, acids, oxidants, chlorine, calcium carbonate, fertilizers, pesticides, petroleum derivatives, tannery, explosives, paper, cardboard, rock wool, paper and cardboard recycling plants and factories		3km		200m
Conditions for the locations of factories producing (detergents, paints, wrought metal plants)		500m	-	50m
Conditions for sites of factories for (textile, glass, paint spraying activities that include organic solvents, smelters and small metal pouring under 100t per month, electroplating plants and fertilizer mixing)		500m		50m
Conditions for the locations of wooden and metal furniture factories (without smelting or extruding)		200m		50m
Conditions for the locations of plastic factories (bags, cups, rolls, tanks), polystyrene factories		250m		50m
Special conditions for plastic shredding sites		500m		50m
Conditions for the sites of the aerobic organic fertilizer project		2km		500m

Conditions for anaerobic organic fertilizer project sites		1km		200m
Conditions for sites of dry waste recycling projects: (paper, cardboard, plastic...)		250m		50m
Conditions for the sites of material retrieval facilities projects (MRF)		1km		100m
Conditions for the sites of material recovery facilities by mechanical and biological methods (MBT)		2km		200m
Conditions for the sites of waste transfer stations projects of (1-50t/ day capacity)		500m		100m
Conditions for the sites of waste transfer stations projects of more than 50t/ day		1km		200m
Conditions for the sites of landfill projects with a capacity of 1-1000 t/year		3km		500m
Conditions for the sites of landfill projects with a capacity of over 1000 t/year		5 km		1 km
Conditions for the sites of battery recycling projects (lead smelting)		3km		500m
Conditions for the sites of tire and oil recycling projects by chemical or thermal treatment		2km		500m
Conditions for the locations of brick and tile factories, stone and marble saws		500m		50m
Conditions for the sites of sand, stone and marble quarries and quarries for the extraction of raw materials		1.5km	-	300m
Conditions for the sites of Ready-Mix Concrete processing projects		1 km		200 m
Conditions for the sites of rubble quarries (crushers)		2,5 km	-	300 m
Special conditions for the sites of natural resource mining projects such as (Gypsum-Phosphate-Pozzolana)		2.5km	-	300m
Conditions for the locations of cement and Phosphate plants and oil refineries		5km		1km

Conditions for asphalt mixer sites		2.5km	-	500m
Conditions for the location of car washing and oil changing enterprises	Outside planned regulated zoned areas	50		
	Within industrial, light Industry or crafts areas	-		
	Within areas of a commercial land use classification	50		
Conditions for warehouse locations	Food and pharmaceutical warehouses, metal and wooden furniture with an area of more than 100m <sup>2</sup>	20m		
	Warehouses of contained chemicals in the form of tanks with a capacity of 1t or more and warehouses of chemicals contained in barrels	250m		50m
	Warehouses for liquefied petroleum gas cylinders	500m		100m
Energy projects	Power plants operating on fossil fuels	2km		500m
	Solar energy projects of PV type or CPV type, which have a generating capacity of more than 5 MW	700m		300m
	Solar energy projects of the Parabolic Trough/CLFR and Dish Stirling type	100m		
Medical waste projects using alternative technologies / devices to incineration as commercial enterprises	Outside planned regulated zoned areas	500m		100m
	Within industrial, light industry or crafts areas	250m		50m
	Within commercially regulated areas			-
Fish farms	Less than 3t	200m		100m
	From 3-20t	500m		200m
	More than 20t	1km		300m
Poultry farms	Farm area 500m <sup>2</sup>	0.5km		100m
	Farm area 1000m <sup>2</sup>	0.6km		150m
	Farm area 2000m <sup>2</sup>	0.7km		200m

	Farm area 3000m2	0.8km		250m
	Farm area 4000m2	0.9km		300m
	Farm area 5000m2	1km		350m
	The farm area is 6000m2	1.1km		400m
	The farm area is 7000m2	1.2km		450m
	The farm area is 8000m2	1.3km		500m
	Farm area 9000m2	1.4km		550m
	Farm area 10000m2	1.5km		600m
Sheep farms	From 1-100 head	0.5km		100m
	From 101-200 head	1km		200m
	From 201-400 head	1.5km		300m
	From 401-800 head	2km		400m
	From 801-1600 head	2.5km		500m
	From 1601-3200 head	3km		600m
	From 3201-6400 head	3.5km		700m
	From 6401 – 12800 head	4km		800m
	12801 head and more	4.5km		900m
Cow farms	1-20 head	0.5km	-	100m
	21-40 head	1km		100m
	41-80 head	1.5km		200m
	81-160 head	2km		300m
	161-320 head	2.5km		400m
	321-640 head	3km		500m
	641-1280 head	3.5km		600m
	1281-2560 head	4km		700m
	2561 and above	4.5km		800m
Horse farms	1-5 head	0.5km		100m
	6-10 head	0.6km		100m
	11-20 head	0.7km		100m
	21-40 head	0.8km		100m
	41-80 head	0.9km		100m
	81-160 head	1km		100m

Conditions for the locations of poultry farms, sheep farms (goat and lamb), cow farms, horse farms  
Compliance with the relevant instructions of the Ministry of Agriculture

## Annex 2

Low-risk economic activities according to environmental classification criteria	
1	Crop growing activities and nurseries
2	Knitting, sewing, embroidery and knitwear workshops
3	Upholstery workshops
4	Repair shop for metalworking products
5	Machine repair shop
6	Electronic and optical equipment repair shop
7	Electrical equipment repair shop
8	Repair Shop of transportation equipment, except for motor vehicles
9	Other equipment repair shop
10	Oil change businesses and car service centers
11	Food warehouses of an area of less than 100m <sup>2</sup>
12	Medicine and medical materials warehouses of an area under 100m <sup>2</sup>
13	Vehicle spare parts warehouses of an area of under 122m <sup>2</sup> .
14	Preparing sites for construction
15	Electrical installations
16	Plumbing, Heating and air conditioning works
17	Completion and finishing of buildings
18	Wholesale and retail trade of motor vehicles and motorcycles
19	Motor vehicle maintenance and repair workshop
20	Sale of motor vehicle spare parts and accessories
21	Sale, maintenance and repair of motorcycles, their spare parts and accessories
22	Other wholesale trade, except for places and yards selling scrap and waste
23	Service activities related to land transport
24	Service activities related to sea & ocean transport
25	Air transport-related service activities
26	Cargo handling
27	Other transport support activities
28	Postal activities
29	Activities of private mail carriers
30	Food and beverage service activities
31	Restaurant and mobile catering activities excluding food factories
32	Serving meals at events
33	Butcher shops, fish shops
34	Bakeries
35	Other food service activities
36	Beverage serving activities

37	Publishing activities except printing presses
38	Activities for the film production, TV shows, sound recordings, music publishing
39	Programming and broadcasting activities
40	Audio broadcasting
41	Programs, radio and television activities
42	Communications
43	Telecommunication activities
44	Radio communication activities
45	Satellite communications activities
46	Other communication activities
47	Computer programming, consulting and related activities
48	Information services activities
49	Financial and insurance activities
50	Real estate activities
51	Legal activities
52	Accounting activities, bookkeeping activities, auditing and tax consultations
53	Main office activities (for companies)
54	Consultancy activities in the field of management
55	Architectural and engineering activities and related technical consultant services
56	Technical tests and analyses
57	Scientific research and development
58	Advertising
59	Market research and opinion polls
60	Specialized design activities
61	Photography activities
62	Other professional, scientific and technical activities not classified elsewhere
63	Veterinary activities
64	Leasing activities
65	Employment and recruitment activities
66	Travel agencies, tour operators, booking services and related activities
67	Security and investigative activities
68	General cleaning of buildings and premises
69	Building cleaning and other industrial cleaning activities with referencing the instructions prohibiting the use of sand blasting
70	Activities related to the service and maintenance of landscaping
71	Office administrative activities, office support activities and other business support activities
72	Integrated office management services activities
73	Document photocopying, document preparation and other specialized office support activities

74	Activities of call centers communication services
75	Organization of conferences and trade exhibitions
76	Activities of payment collection agencies and credit bureaus
77	Other support service activities for works not classified elsewhere
78	Education
79	Activities of medical and dental clinics except hospitals
80	Other activities in the field of human health
81	Facilities for providing nursing care with accommodation
82	Residential care activities for people with mental disabilities, psychiatric patients and addicts
83	Residential care activities for the elderly and people with disabilities
84	Other care activities with accommodation
85	Group work activities, without accommodation
86	Creative activities, arts and leisure activities
87	Activities of libraries, archives, museums and other cultural activities
88	Sports activities, leisure and entertainment activities
89	Activities of organizations that have membership
90	Repair of computer equipment and computer peripherals
91	Repair of communication equipment
92	Repair of consumer electronics
93	Repair of household appliances, household equipment, fire equipment
94	Repair of shoes and leather products except tanning/ dying
95	Repair of other personal and household goods except tanning (watches, washing and cleaning of textiles and fur products (dry)
96	Hairdressing and other types of cosmetology
97	Funeral and related activities
98	Other personal service activities not classified elsewhere

### Annex 3

<b>Economic activities of limited risk according to environmental classification criteria</b>	
1	Car body work and painting enterprises Dry clean and car wash
2	Glass workshops
3	Ceramics, pottery, clay and mosaic workshops.
4	Textile workshops for making clothes, shoes, fabrics, furs, carpets and bags (without dyeing or washing operations).
5	Grading and packing projects, packing and packaging of vegetables and fruits.
6	Dairy and cheese factories
7	Grain mills
8	Packing of food items such as rice, sugar, starch, cereals
9	The manufacture of chocolate, cocoa, confectionery.
10	Food factories such as biscuits, candies, chips, meat, Halva with Tahini, pasta and juices
11	Pickle factories
12	Jewelry and costume jewelry workshops without smelting.
13	Marble tiles plants
14	Brick plants
15	Stone cutters/ saws
16	Water purification and cup filling stations plants
17	Ice plants and factories
18	Workshops for poured metal except lead
19	Food warehouses with an area exceeding 122m <sup>2</sup>
20	Warehouses for timber, iron or cement
21	Medicines and medical materials warehouses of an area exceeding 100m <sup>2</sup>
22	Vehicle spare parts warehouses of an area exceeding 100m <sup>2</sup> .
23	Vocation and artisanal workshops, including blacksmithing, carpentry, lathes and metalworking
24	Plastic shredders
25	Warehouses for building materials
26	Gas cylinders warehouses
27	Food preparation workshops for distribution purposes
28	Plastic factories
29	Detergent mixing plants and plants
30	Quarries, land reclamation and crushers
31	Sorting and compacting dry waste
32	Wooden and metal furniture factories
33	Factories and plants for cosmetic materials

34	Tobacco and shishah molasses factories
35	Overnight parking of cars and machinery
36	Decentralized sewage treatment plants designed for a flow that serves less than 100 inhabitants per day
37	<p>Livestock and fish farming projects include:</p> <p>Fish farming and aquaculture projects with a production capacity of 20t per year</p> <p>Cow and buffalo breeding projects in which the production capacity of the project is about 100 head</p> <p>Horse breeding projects in which the production capacity of the project is 200 head</p> <p>Lamb and goat breeding projects with a production capacity of 2000 head</p> <p>Poultry, quail and rabbit breeding projects with a production capacity of 50,000 animals</p>
38	Factories and workshops for the formation of paper and cardboard dishes and cups.
39	Solar power generation projects for projects less than 5MWs using photovoltaic panels

<b>Medium-risk economic activities according to environmental classification criteria</b>	
1	Livestock and fish farming projects include: Fish farming and aquaculture projects in which the production capacity of the project is 20t per year or more Cow and buffalo breeding projects in which the production capacity of the project is 100 head or more Horse breeding projects in which the production capacity of the project is 200 head or more Lamb and goat breeding projects in which the production capacity of the project is 2000 head or more Poultry, quail and rabbit breeding projects in which the production capacity of the project is 50,000 or more
2	Dairy and cheese factories
3	Milk factories
4	Alcoholic/ spirits beverages factories
5	Sponge factories
6	Asphalt mixers
7	Commercial facilities for storing crude oil, gas, oil derivatives and petrochemical products with a storage capacity of 1000 - 5000t
8	An electric power plant using solar energy for projects where the production is from 5-20MW using photovoltaic panels
9	Tourist and recreational projects, which include parks, golf courses and shooting ranges.
10	High-rise buildings more than 15 floors, large commercial buildings(malls), multi-story parking lots
11	Waste management, treatment and disposal projects which include: Landfills that receive less than 1000t of waste per year Waste transfer stations with a storage capacity of less than 50t/ day Material retrieval facilities (MRF) Anaerobic and aerobic organic fertilizer factories
12	Fertilizer mixing projects
13	Paper and cardboard recycling plants
14	Industrial use of alternative fuels
15	Decentralized sewage treatment plants designed for a flow that serves less than 2,000 inhabitants per day
16	Industrial wastewater treatment plants for one facility

High-risk economic activities according to environmental classification criteria	
1	Extraction of crude oil and natural gas
2	Crude oil refineries and the manufacture of refined petroleum products
3	Mining, metallurgic and mine expansion. The mining industries include but are not limited to cement, gypsum and clinker, for example
4	Energy production projects to include but not limited to: Industrial facilities for the production of electricity, steam and hot water Industrial facilities for the transportation of gas, steam and hot water Electric power plants High-voltage electric power transmission line of a length of greater than 11km An electric power plant using wind energy. An electric power plant using solar energy for projects over 22MW using photovoltaic panels An electric power plant using concentrated solar energy
5	Chemical plants to include but not limited to: (Pesticides, peroxides, paints, solvents, fertilizers, and petrochemicals)
6	Manufacture of batteries
7	Metallurgical plants that include one or more of the following operations: (Extruding, galvanizing, smelting, purification and coating), to name a few: - Copper factories. - Aluminum factories. - Iron factories.
8	Facilities for the manufacture of transport machinery and the manufacture of its engines (e.g.: cars, trains, etc.,)
9	Construction projects of main roads, railways, bridges, airports, ports, shipyards, boats, sea platforms, sea backfill projects and waterways to allows the passage of ships
10	Glass and fiberglass factories
11	Sugar factories
12	Yeast factories
13	Factories of vegetable oils and fats
14	Manufacture of weapons and ammunition
15	Slaughterhouses
16	Nuclear facilities include: Nuclear reactor Processing and storage of nuclear fuel or radioactive waste Reprocessing of radioactive nuclear fuel Production and enrichment of nuclear fuel Facilities for the management and disposal of nuclear fuel or radioactive waste
17	Water collection, treatment and delivery projects that include any of: A water supply network to serve a population of more than 250,000 inhabitants Artificial dams and lakes Facility for the transfer of 20,000m <sup>3</sup> of water Desalination plants for river and sea water Groundwater extraction or an industrial groundwater recharge scheme where the annual volume of extracted or recharged water is equivalent to or exceeds 3million m <sup>3</sup> .
18	Centralized sewage treatment plants and sewage networks Decentralized treatment plants designed for a flow that serves more than 2000 inhabitants per day

19	Waste management, treatment and disposal projects which include: Landfills that receive 1000t or more of waste per year Waste transfer stations with a storage capacity of 50t per day or more Mechanical and biological material recovery facilities (MBT)
20	Alternative fuel production plants
21	Hazardous waste treatment, disposal and storage projects, which include any of: Facilities for the treatment or disposal of hazardous waste or landfills for hazardous waste Recycling projects of used batteries, used tires, used electronic devices and spent oils.
22	Rehabilitation projects of solid waste landfill sites and facilities
23	Construction and/or rehabilitation or dismantling of pipelines for the transportation of oil, gas or chemicals with a diameter of or exceeding 1m and/ or a length of 12km.
24	Commercial facilities for the storage of crude oil, gas, oil derivatives and petrochemical products with a storage capacity of more than 1222t.
25	Animal protein factories
26	Industrial/ artisanal cities
27	Sports cities
28	Textile and leather factories and workshops for manufacturing clothes, shoes, fabrics, furs, carpets, bags, that carry out one of the following operations: Tanning Washing
29	Porcelain and porcelain factories
30	Rubber and plastics factories
31	Paper and cardboard factories
32	Medical waste incineration projects
33	Industrial wastewater treatment plants for more than one facility.
34	Table salt factories except packaging.

## Annex 6

Restricted economic activities			
No.	Economic activity	The entity responsible for the restricted economic activity/approval authority	Restricted economic activities
1	Weapons and war machines	Cabinet of Ministers Ministry of the Interior	The manufacture of war machines of all kinds Arms and ammunition industry Explosives industry
2	Legal services	The Bar Association	Attorney offices Legal consulting offices
3	Public accounting	Ministry of Industry, Trade and Supply Jordanian Association of Certified Public Accountants	Public accountant offices Public accountant companies Tax consulting offices
4	Financial services	Central Bank of Jordan	Banks Currency exchange offices Stock exchange offices Deposit guarantee
5	Insurance and reinsurance	Central Bank of Jordan	Insurance companies Reinsurance companies
6	Travel and tourism agents	Ministry of Tourism and Antiquities Ministry of Awqaf, Islamic Affairs and Holy Places	Tourism and travel offices Hajj and Umrah Services offices
7	Engineering services	Jordan Engineers Association	Engineering offices
8	Land transportation services	Land Transport Regulatory Commission	Passenger transportation Transportation of goods and containers on roads
9	Radio and television broadcasting services	Media Commission	Terrestrial television broadcasting Satellite television broadcasting Radio broadcasting Re-broadcasting of radio or television broadcasts Artistic production and distribution
10	Mining services	Energy and Minerals Regulatory Commission	Quarries Crushers Cement Phosphates Coal mining Oil extraction Potash extraction Other extraction activities
11	Security and protection services	Ministry of the Interior	Armed security services Unarmed security services
12	Basic educational services	Ministry of Education	Kindergartens Private schools Educational centers
13	University education services	Ministry of Higher Education and Scientific Research	Universities Intermediate community colleges Institutes

14	Economic activities related to aviation	Civil Aviation Regulatory Commission	<p>Air transportation of passengers and cargo</p> <p>Air ambulance services</p> <p>Air navigation and guidance services</p> <p>Ground services at the airport</p> <p>Ground handling agent</p> <p>Air freight forwarder</p> <p>Formal air freight forwarder</p> <p>Formal agent for air mail</p> <p>Aircraft and air transport equipment rental</p> <p>Supervisory agent for charter and private aircraft services</p> <p>Aircraft maintenance management</p> <p>Training and qualification of flight attendants</p> <p>Flight training and aircraft piloting</p> <p>Rental of airships and helicopters for recreation</p> <p>Paragliding clubs, air games and recreational air activities</p> <p>Operation of a civil airport open for public and private use</p> <p>Aircraft maintenance</p> <p>Maintenance of rubber tires for vehicles, equipment and machinery, except for renovation</p> <p>Manufacture of navigation and aviation guidance equipment</p> <p>Aircraft industry</p> <p>Manufacture of spare parts for aircraft and other auxiliary equipment</p> <p>Manufacture of ground equipment for flight training</p>
15	Customs clearance	Jordan Customs Department	<p>Customs clearance services</p> <p>Customs consulting services</p>
16	Fuel supply services	Ministry of Energy and Mineral Resources Jordan Petroleum Refinery Company	<p>Gas stations</p> <p>Gas distribution stations</p> <p>Fuel distribution</p>
17	Telecommunications services	Telecommunications Regulatory Commission	<p>Telecommunications</p> <p>Supplying of internet</p>
18	Health services	Ministry of Health	<p>Medical and dental clinics</p> <p>Hospitals</p> <p>Laboratories</p> <p>Physical or health centers</p> <p>Physical therapy</p> <p>Pharmacies</p>
19	Electricity services	Electricity Regulatory Commission	<p>Electricity generation</p> <p>Electricity distribution</p>
20	Power generation	Ministry of Energy and Mineral Resources Energy and Minerals Regulatory Commission	<p>Non-renewable energy</p> <p>Renewable energy</p>
21	Publishing and distribution services	Media Commission	<p>Printing presses</p> <p>Newspapers, periodicals and magazines</p> <p>Publishing and distribution</p>
22	Construction contractor services	Ministry of Public Works and Housing Jordanian Construction Contractors Association	<p>Construction contractors of all categories</p>

## Annex 7

Prohibited economic activities according to the Regulating the Investment Environment Regulation for sectors, activities and services of activities benefiting from the Comprehensive Investment Service

<b>Prohibited economic activities</b>	
1	Manufacture, storage or trade of radioactive, nuclear or environmentally harmful substances
2	Manufacture, storage or trade of dangerous, narcotic or toxic substances, except for the requirements of the industry authorized to establish them under the relevant legislation.
3	Printing of banknotes, stamps, manufacture of coins
4	Production and trade of active biological and genetic materials
5	Industry, production of cigarettes, tobacco and shisha molasses
6	Any other activities that are decided to be prohibited in accordance with the applicable legislation
